VOLUME LXIX., NUMBER 16. REDWOOD CITY, SAN MATEO COUNTY, CALIFORNIA, FRIDAY, JULY 27, 1928. ESTABLISHED IN 1859.

Date to be Set For Hearing of W. P. Proposal

Opinions Sought From Other Lines On the Peninsula

HEARING TO BE SET

Work on Survey Continues Here

A date for hearing the petition of the Western Pacific for a certificate to enable that line to build its proposed all-rail route along the peninsula into San Francisco will soon be set by the Interstate Commerce Commission, it was announced this week. Before setting the date for the hearing the commission will secure the opinions of other rail lines in the territory and determine whether the petition of the Western Pacific will be opposed by the Southern Pacific and the Santa Fe railroads.

The certificate which the Western Pacific has asked of the Interstate Commerce Commission affects eleven counties of California, portions of which are now served by the two other lines. In order to determine whether or not these lines will contest the petition the commerce commission has sent out the customary questionnaires. These must be filled in by the companies and returned within 60 days of receipt.

In the meantime, while awaiting a final answer to its petition by the Interstate Commerce Commission, the Western Pacific is continuing its survey of a route along the marsh from this city to San Francisco. The survey is being made by engineers from an engineering office established by the railroad company at South San Francisco.

If the necessary sanction is granted by the commission, construction of the line to connect this city with San Francisco will begin immediaely.

According to plans of the company, the San Francisco-Redwood City line will be twenty-five miles in length and will cost approximately $3,700,000. Officials of the company were not yet prepared to announce the exact location of the San Francisco terminal.

The connection from Redwood City to Niles, to give the all rail transcontinental route to San Francisco will be made shortly after the construction of the Redwood line. No definite plans have been announced for the exact route which will be followed by that line.

Preliminary plans call for the line to closely follow the bay shore, serving a section of the city along the waterfront from Islais Creek to Redwood City via South San Francisco, Burlingame and San Mateo. The exact route from Redwood City to Niles is not disclosed but it is expected to connect with the Western Pacific's line that now runs into San Jose.

It will also connect with the South San Francisco Belt Railway which serves the Union Stock Yards and packing houses in that territory.

The projected development of the Western Pacific for which the certificate from the Interstate Commerce Commission was asked on July 11 will mean the expenditure of $13,500,000 by the company. Included in the projected developments are the following items:

Immediate construction of a line from a San Francisco terminal, down the peninsula to Redwood City. Ultimate extension of this line to Niles, Alameda county, for connection with the main line.

Immediate construction of a line from Niegarden on the Western Pacific main line, 11 miles southwest of Stockton, through the San Joaquin valley, to Kings river, via Fresno. Ultimate extension of this line rom Kings river to Bakersfield.

Construction of a line by the Sacramento Northern Railway, another subsidiary, from a junction with the Holland branch to Ryde, in the southwestern part of Sacramento county.

Construction of a branch line from Brack, near Stockton, for a distance of three and a half miles east.

The line from Nilegarden to Kings River, via Fresno, thence to Bakersfield, involves an expenditre of approximately $8,500,000 and will be 138 miles in length. It will traverse the San Joaquin Valley east of the San Joaquin River and will enter the city of Fresno from the west.

Local Girl and Bus Driver Wed

At a quiet wedding at the home of the groom's mother in San Francisco last Friday, Miss Helen Craine of this city became the bride of Peter Salvotti, driver of one of the P. R. T. stages. Mrs. Salvotti is a niece of Miss Margaret Loftus, San Mateo County nurse. She has been a bookkeeper at the Community hospital at Beresford since that institution was opened about four years ago.

FIRE DESTROYS HOUSE; BARN ON WOODSIDE ROAD

A house and barn on Valota avenue and the Woodside road were destroyed by fire Saturday night. The damage was estimated at $2,000. The house was occupied by a Japanese gardener and his family. A number of is hired help occupied the barn. All escaped injury from the flames.

Mr. and Mrs. Norman Beatie have returned from a honeymoon spent in San Francisco. Beatie is in charge of the big suction dredge maintained on the bay by the Pacific Portland Cement Co.

PLANS COMPLETED FOR WATER EVENTS BY EXCHANGE CLUB

Many Fine Numbers Are Arranged For At Water Carnival

SCHOLARSHIP FUNDS

Expert Swimmers Will Participate in Event

Plans were completed this week for the Redwood City Exchange Club water carnival, which will be held at the pool of the Sequoia Union High School at 7:30 next Tuesday evening. A committee headed by Jim Eva, swimming coach of the high school has outlined a program of athletic and novelty events which will surpass even the splendid carnival staged by the club last year. Fourteen exhibton events have been arranged.

Among those who will participate in the swimmng are three members of the Olympic Club of San Francisco. They are Guerton Carroll, who qualified in the Olympic game try-outs, Clyde Diaz and Frank Walton. Diaz will give an exhibiton of clown diving, and Walton, who is Pacific Coast long distance champion, will give an exhibition of fancy swimming.

Other events include swimming races between teams of the Sequoia Union High School and the Palo Alto High School and a 25-yard dog paddle race between Eddie Zwerlein and Jim Eva.

The carnival is an annual event of the local service club, heretofore given free. This year an admission charge of 25 cents is being made in order to raise funds for a scholarship in the high school.

General arrangements for the event are being take care of by Frank Griffin. A barbeque is also being arranged for and this is being mnaged by Harry Hallett. All the Exchange Clubs of the peninsula will meet here in the evening preceeding the carnival.

KIWANIS CLUB MEN HAPPYLAND GUESTS

Interesting Program Presented by Children

Members of the Redwood City Kiwanis Club were guests of Happyland, the camp maintained for children in the hills near here by the San Francisco Bulletin, at the meeting Wednesday. Since the opening of the camp here about four years ago the children of the camp have been in a way adopted by the Kiwanis club. Every Saturday while the camp is maintained here the children have been brought to the Sequoia Theatre by the Kiwanians. The Ellis J. Arkush Entertainment Co., proprietors of the show, and Otway J. Cosgrave, the manager, have made this possible by throwing the Saturday matinee open to the kiddies from the Bulletin's camp.

Because of this and other favors done by the club for the camp, the Kiwanians were treated to a special dinner and program in place of their regular Wednesday noon dinner at the Episcopal parish house. The meal was prepared by Oscar Herman, chef of the camp, and was pronounced as excellent by the Kiwanians.

Following the meeting an interesting program was put on by the kiddies of the camp with some numbers added by the Kiwanians. The meeting was in charge of William Alexander, chairman of the underprivileged child committee.

Former Local Coach Gets Appointment at Stanford University

James "Rabbit" Bradshaw, former University of Nevada grid star and at one time athletic coach of the Sequoia Union High School, has been appointed assistant physical director of Stanford University. The appointment was made Tuesday by Dr. Ray Lyman Wilbur, president of the university.

Bradshaw, who has been coaching the Gallileo high school eleven in San Francisco, will assist Coach E. P. "Husky" Hunt with the varsity basketbal team and will probably be placed in charge of the freshman cagers. He may devote some time to other sports.

Mr. and Mrs. C. D. Payton of East Hopkins street are the parents of a baby girl born last week.

Plan Terminal For Peninsula Travel in S. F.

Citing the proposal of the Western Pacific Railroad Company to construct a line from Redwood City into San Francisco and eventually to route its trans-continental trains along the peninsula and direct into the metropolis, Supervisor Milo F. Kent of San Francisco on Monday introduced a resolution before the board of supervisors of that city calling for a meeeting of the board of supervisors with officials of the railroads and bus lines to discus the proposal of constructing a union terminal.

In speaking of this proposal, Kent stated that he felt that the move by the Western Pacific was only the beginning of a great era of transportation development for San Francisco. The Santa Fe, he said, he felt sure would follow the lead of the Western Pacific in building a rail line along the peninsula and into San Francisco. Kent also stated that a new electric line was a possibility along the peninsula and that a great increase in bus traffic into and out of San Francisco was a certainty.

It is the proposal of Kent to have a large uptown terminal for all railroads, electric lines and bus lines running into San Francisco. This would provide better service for commuters than is provided by the present S. P. terminal on Third street. The terminal would be owned municipally, according to Kent's proposal and would provide a good income for San Francisco as well as giving better transportation service.

Kent stated that he believed that the peninsula steam service will shortly be electrified. The citys and public's interest demand that all forms of transportation be correlated and made available with as little effort as possible. Kent stated that he did not know of another municipality owned union terminal, but said:

"Union terminals owned by the railroads are to be found in many cities. When the different companies cannot get together, it would seem the proper thing for the city to step in and take the initiative.

"The ultimate destiny of San Francisco lies down the peninsula, and the most urgent necessity now for that section is rapid transit facilities.

"My plan is one in which the city would build a grand union depot, centrally located. It would be revenue producing and a big benefit to business trade, the commuters anl citizens generally."

The proposal of Supervisor Kent has met with hearty approval of the peninsula where every improvement in transportation to San Francisco is a direct benefit. Three road projects now under way, the Bay Shore highway, the Coastside highway and the extension of Juneperro Serra boulevard will effectually relieve te stress of motor transportation to and from the city, but improvement is sought in rail and terminal facilities. Supervisor Kent's proposal would do much to improve the latter.

The resolution introduced by Supervisor Kent read:

"Resolved. That the public interest and necessity demand the establishment of a municipal union depot for the terminal of all railand business, carrying passengers in and out of San Francisco, to be centrally located, where electric and steam trains, and motor busses will have modern and adequate facilities for embarking and disembarking passengers in safe and rapid manner, and

"Further resolved, that to consummate this revenue producing project of a municipally owned union depot for the welfare ot our citizens that the Public Utilities Committee call in consultation a group of citizens to property survey the situation, confer with railroad, bus and transportation officials and report back to this board their recommendations."

The resolution was referred to the public utilities committee for a public hearing and recommendation.

DeMolays Elect New Officers

Redwood Chapter Order of De Molay elected new officers at the meeting of the order Tuesday evening in the Masonic temple. Lonnie Tate was elected master councilor of the chapter. He has been acting senior councilor for the past six months. To the latter office Arthur Lampkin was elected. Darrel Tate was elected junior councilor to succeed Lampkin. The appointive members of the chapter will be announced later by the master councilor.

At this meeting three new members of the advisory committee were introduced by Robert Hammond, the chairman of the committee. They are Robert Klassan, Albert Simpson and Edward Jennings.

Sutter Creek—$20.000 new auditoriu will be built for local high school.

Divers Find Body In Lake Waters

The body of Miss Aileen Stroecker, drowned in Searsville lake Sunday afternoon, was located by divers Tuesday in the water of the lake, about 40 feet from shore. Miss Stroecker, who was 25 years old, was with her brother, Charles Stroecker, on a picnic at Searsville lake. She had been swimming in the lake and was last seen swimming toward the raft near the center of the lake.

Being an expert swimmer, the fact that she was not seen again during the afternoon caused little uneasiness until it was time to leave for their home at 425 Twenty-second street, San Francisco. When she did not then appear the brother notified the sheriff's office.

The search for the missing girl continued for two days. She was finally found by divers working under the direction of Acting Sheriff Edward Farrell and Deputy Sheriff Tom Maloney.

WORK PROGRESSING ON ROUTE OF ROAD ALONG COASTSIDE

Engineers Survey High-Way Along R. R. Right of Way

TO ELIMINATE GRADE

New Highway Will Cost $5,300,000

Actual work on the grading and surfacing of the Coastside highway from San Francisco to Santa Cruz along the coastline of this county will be undertaken as soon as plans and specifications for the work can be prepared by the county engineers of San Mateo and Santa Cruz county. A force of men from the office of County Engineer Kneese is now at work on that portion of the road which will follow the right of way of the abandoned Ocean Shore railroad and will follow the shore line around Pedro Point instead of crossing the high Pedro mountain as the present road does.

At the same time that the work on Pedro point is being rushed to completion in this county, Engineer Bowman of Santa Cruz county is busy with plans for the highway, where it passes the Wardell bluffs in that county. These two portions of the road will be the first to be built as they are at present the two worst places on the present coastside road. Other portions of the road will be built a section at a time as quickly as possible.

Final plans for the road were made at a meeting of the directors of the tri-county highway district held in San Francisco Monday afternoon. The meeting was attended by Supervisor Poole of San Mateo County, George Rostrom of Santa Cruz county, Andrew Gallagher of San Francisco county, County Engineer Kneese of this county, County Engineer Bowman of Santa Cruz and Assistant County Engineer R. E. Omar of San Francisco.

The roadway will be 100 feet in width when completed and will cost approximately $5,300,000. Of this amount San Mateo county will pay 20 per cent, Santa Cruz 15 per cent and San Francisco 55 per cent.

Reduced Air Rate To Be Effective Here August 1st.

Increased poundage of air all expected to result from the new 5-cent rate, effective August 1st, wil require the addition of a fleet of new mail-planes on the San Francisco and Oakland to Chicago route, W. G. Herron, vice-president in charge of traffic for Boeing Air Transport, Inc., announced this week.

A series of special mail planes, powered with Pratt and Whitney "Hornet" motors and designed to cruise at 115 miles per hour, are now under construction at the Boeing Airplane Company's plant in Seattle. New Boeing-built air mail express and passenger planes were recently placed on the Pacific Air Transprt route. A total of 30 Boeing plaines, each with a capacity of 1600 pounds, are now operating on the two lines.

A nickel postage on Air Mail letters weighing one ounce or less, only three cents more than the ordinary postage, will be within reach of practially all business and social correspondents, Mr. Herron believes, and it is expected that the volume of mail will increase rapidly.

Ten cents postage or each additional ounce after the first ounce will be required, but few letters reach the one-ounce limit, it is contended. One ounce, the statement says, eaquals four pages of average weight business paper with the envelope. Four pages will carry about 2000 words of single spaced typing.

The reduced rate is the only change in the Air Mail regulations which became effective more than a year ago. Five cent air mail stamps will be issued but their use is not compulsory; any postage may be used. Air mail envelopes are recommended by the Post Office department, but ordinary envelopes ay be used if plainly marked "Air Mail." Air Mail will continue to be collected from all box-

Mrs. Lillian Deluchi is chairman of a committee which is making arrangements for a card party to be given next Tuesday evening by the Italian Catholic Federation. The affair will take place in the Cormel Men's club rooms.

Herbert Hoover To Pass Through Here This P. M.

Mayor Beeger To Accomapny G. O. P. Leader

POLICE ESCORT ALSO

Decorations Planned For Belated Welcome

Plans were being completed this week for the reception of Herbert Hoover, the republican candidate for president, who will pass through Redwood City tomorrow afternoon at 4 o'clock. The future president will pass along Broadway and Main streets and will be greeted by his many friends and supporters. The Hoover for President club has arranged to have the streets decorated with flags in honor of the candidate's visit.

Hoover will be accompanied as far as Palo Alto by Mayor Henry Beeger of Redwood City, and will also be given a police escort.

The campaign for Herbert Hoover is being managed from his home at Stanford. The former secretary of commerce has arranged a series of conferences with many of the republican leaders of the state, including Senators Johnson and Shortridge and Governor Young. These three are claimed to be the three outstanding republican leaders of the state, each with his own particular following. All three have pledged their hearty support to the Hoover campaign.

Palo Alto and the whole peninsula are noting the effects of the location here of a presidential campaign headquarters. An unusually heavy load has been placed upon the telephone company, it is reported, by the necessity of installing many phones on the campus and in handling the exceptional number of calls incident to the campaign of the republican candidate.

LEGION MEN HEAR PLANS PROPOSED FOR AIR CIRCUS

President E. J. Moffett of the Pacific Aero Club and a number of aviators from the club joined with the members of Redwood City Post of the American Legion Monday evening at their regular meeting at the fire house. The meeting was devoted to a discussion of aviation and particularly of the recent ordinance passed by the board of supervisors of this county regulating aviation and providing for the licensing of flyers. Moffett reiterated the statements he made before the supervisors at the time that the ordinance was passed.

The county's ordinance Moffett stated, is unfair and unjust to many of the old time aviators, who though pioneers in the industry would be unable to fly because of the provisions of the ordinance.

Moffett also told of plans for a great aerial circus which it is planned to hold here some time in September. The ordinance if enforced would necessitate the abandonment of these plans, he stated. However, Moffett expressed the hope that the ordinance might be set aside for this event.

The meting was presided over by the post commander Dr. R. C. Frazier, who is an aviation enthusiast and is doing much to secure the aviation industry for this city.

Two Men in Wreck at Broadway Crossing

The crossing at Broadway, north of Burlingame, where the present terminal of the Bay Shore highway crosses the Southern Pacific tracks almost claimed two more victims this week. F. Condes, 228 Ellsworth avenue, San Mateo and George Dornberger, 209 Amita road, Burlingame are the two who were miraculously saved from a fate similar to that which overcame two people on the same crossing two weeks ago.

The two men occupied a small machine which was crossing the tracks just as a fast passenger train was approaching. They were not aware of the train until it struck the front of the machine throwing it to one side a mass of wreckage. Neither of the occupants were injured by their narrow escape.

Boy Shot by Friend Returned to Home From S. F. Hospital

William Meherin, son of Fire Commissioner Meherin of San Francisco, was brought home this week from St. Luke's hospital in San Francisco, where he was operated on for the removal of a bullet from his abdomen. Young Meherin was accidentally shot near his father's home at Emerald lake by Leonard Holt, son of Charles Holt of the Leonard & Holt realty firm.

Holt was looking at a new gun which Meherin was carrying when it was accidently discharged. The boy's condition was for a time considered serious.

LOCAL REALTORS HEAR DISCUSSION OF APPRAISAL

More Equitable Tax And Appraisal Is Sought By Realtors

Members of the Redwood City District Real Estate Board met Wednesday morning at the city hall to hear an address by Peter Hanson of Glendale, chairman of the appraisal committee of the California State Real Estate Board In addition to realtors from Redwood City, San Carlos and Palo Alto, County Tax Collector Ambrose McSweeney, County Assessor Dan Flynn and County Recorder T. C. Rice were present.

Following the address by Hanson, the local board voted to further the work of the state association in its efforts to secure a fair and equitable appraisal of property in California. The motion was made by Dan Stafford, chairman of the appraisal committee of the local board.

The meeting of the real estate board was called to order by Dave L. Walter, who is executive councelor of the local board on the California association. Hanson explained that the realtors' association was working with the State Tax Commission.

Mrs. Jack Benson of 228 Main street, Miss Margaret Magee of 158 Lincoln avenue, and Mrs. W. C. Glass and daughter of 1442 Edgehill Drive, Burlingame, have returned from a two weeks' vacation spent at Ben Lomond Lodge in Santa Cruz mountains.

Seeks More Laurels

Washington.—One of the veteran explorers and geologists of the geological survey, Frank C. Schrader—the man who pushed up through the heart of unknown Alaska a quarter of a century ago and was at Nome when the big gold strike was getting under way—is preparing to go out into the field for further research this year, at the age of sixty-eight. Montana mining districts will likely claim his attention this summer. The West is familiar ground to him, for his duties have called him to Idaho, Nevada, Utah and California.

Mr. Schrader has been in the government service since 1891, having been born in Sterling, Ill., October 6, 1860. He is one of the oldest employees in the interior department.

North of the Arctic circle has been the theater of his operations in the heyday of his explorations. He and his party outfitted at Bergman, Alaska, in 1901 and crossed the Arctic divide, the Endicott mountains, over which Capt. George H. Wilkins and his pilot, Ben Eielson, flew many times to and from Point Barrow.

Trip to Nome.

Down the Anaktuvuk river, that flows toward the North pole, and then down the Colville river to the Arctic ocean they went, having packed their canoes over the mountains. They worked their way along the barren coast of the Polar ocean and traveled with Eskimos to Point Barrow.

A whaleboat was secured at Point Barrow, and then south and west Mr. Schrader and his party went to Cape Lisburne and then through the famous Northwest passage by collier to Nome.

In that memorable trip, which opened up interior Alaska to science and the better use of mankind, Mr. Schrader and his party encountered many types of landscape. On the Endicott plateau they found valleys 3,000 feet deep, and adjoining this plateau they traversed gently rolling country along the Anaktuvuk plateau. Then came the coastal plain, 100 miles to the Arctic ocean, featuring soft rocks and silt, with beds of coal running through them and creeping willows on the shore of the Arctic ocean.

In 1896, on a trip down the Yukon river below the mouth of the Tananu river, in a great bank of silt, Mr. Schrader found the remains of a great mastodon with 11-foot tusks. As he was then traveling in a rowboat the tusk was too weighty to be transported, so he sawed off a piece, and this is now reposing on the mantlepiece of his home. The point where the mastodon was found was not far from the site of the present town of Fairbanks, but there was no town there in those days.

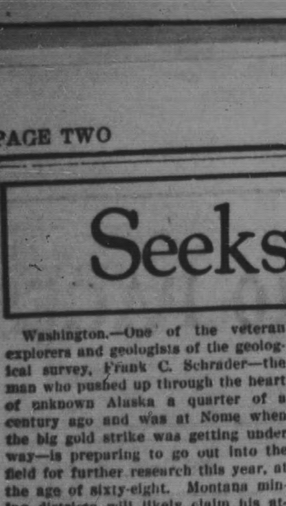
Gold Strike at Nome.

In the fall of 1899 Mr. Schrader came down the Yukon river and stopped at St. Michaels, and heard that there had been a gold strike at Nome. In that community accommodations were at a premium and the six or eight in the Schrader party hired one room in a hotel and slept on the floor. The gold diggings were along the beach and at Anvil Creek and the prospectors were living in tents on the beach.

Some of the miners kept their gold in old washtubs, covered with canvas, buried in the ground beneath their tents. Nuggets worth $7 to $8 were given away by the miners to the government men.

Some of the inhabitants of Nome believed the gold was washed up the sea from its depths, as the beach would be found sparkling with nuggets and small pieces of gold, but Mr. Schrader was able to inform them that the churning of the waves uncovered the gold on the beach itself.

NEW BUREAU CHIEF

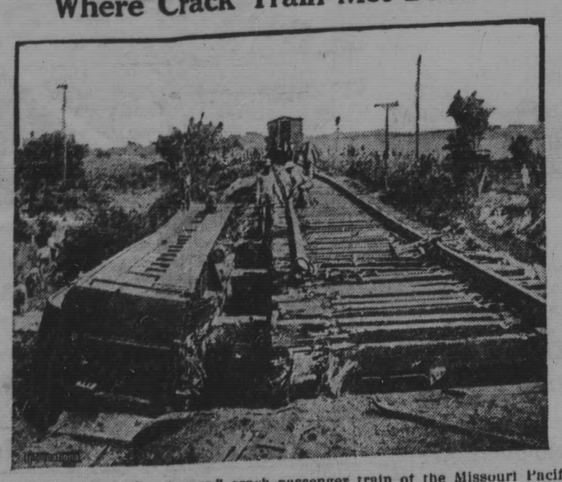


Nils A. Olsen, who has been appointed chief of the bureau of agricultural economics of the Department of Agriculture succeeding Lloyd S. Tenny, resigned.

NEW JOCKEY GENIUS

A new riding hero is basking in the full warmth of the turf spotlight today. George Shreiner, lad of seventeen years who is under contract to ride for Maxey Hirsch, is the latest lad to come to the fore as a jockey genuis. The photograph shows a closeup of Shreiner's hands which have a firm grip on the reins.

Where Crack Train Met Disaster



The derailed "Southerner," crack passenger train of the Missouri Pacific after it had fallen from the trestle near Iola, Kan., injuring 60 of the passengers, some fatally. The rails on the trestle were torn up by the force of the train's fall.

LEADS ORCHESTRA IN ANOTHER TOWN

Inventor Uses Radio to Direct Players.

Berlin.—Conducting an orchestra hundreds of miles away has become possible with a special type of piano for which the inventor, Dr. Erich Fischer, has taken out patents in all countries.

Skeptics were in the majority when the papers announced that Doctor Fischer would proceed to Goettingen with several soloists and from there conduct the orchestra of the High School of Music playing in Berlin.

To every one's surprise, however, the experiment turned out a complete success, the orchestra in Berlin playing and the soloists in Goettingen singing with the same precision and accuracy as though all were assembled in a common hall with eyes glued to the conductor's baton.

The technique of this scheme, promising to become an incalculable time and money-saving expedient, is a simple one. Doctor Fischer seated himself at a piano which, though soundless for the human ear, accurately records and transmits to a highly sensitive microphone inside not only single tones, cords and tempi, but also diminuendoes and crescendos, all of which were promptly wirelessed to the orchestra in Berlin.

Here each player was equipped with a headphone, the various groups of instruments, as strings, wood-winds, brass, etc., each being installed in separate rooms.

The tones of this scattered orchestra were collected in a common receiver from where they were flashed by wire back to Goettingen and there released through the medium of several very elaborate and powerful loud speakers.

Expert engineers estimated that the time that elapsed between the conductor's cues at Goettingen and the return of the full orchestral reproduction from Berlin was less than the interval between a conductor's signals and his orchestra's response in the same hall.

Never Fails

Recklessness is almost always followed by a reckoning.—Boston Transcript.

POULTRY

EGG PRODUCTION SHOWS INCREASE

(Prepared by the United States Department of Agriculture.)

Radical changes in poultry management practices the last few years are having a marked effect in lengthening the production season, according to Rob R. Slocum of the bureau of agricultural economics, United States Department of Agriculture, addressing the American Institute of Refrigeration at Washington.

Increasing egg production at an earlier date in the winter than usual and the production of out-of-season broilers have caused apprehension in the cold storage industry over the possibility of a decrease in the amount of cold storage space required for poultry and eggs, but Mr. Slocum assured the institute that the volume of these products produced and stored during the normal season will continue to be as great as at present, or even increase with the normal increase in population.

"It is probable," he said, "that both increased production of eggs during the fall and early winter and increased production of broilers out of the normal season will continue to expand. On the other hand it must be remembered that the great bulk of the annual egg and poultry crop of the United States is the product of general farms of the Middle West and only a relatively small part the product of specialized poultry farms. While specialized farms are increasing in number and importance there is no reason to anticipate that the farm flocks will not continue for years to come to produce the greater part of our poultry and egg supplies. Moreover, the eggs from these flocks will be produced largely in the spring months and the poultry raised will be hatched during the normal spring months and marketed during the fall and early winter. This being true, it follows that a large surplus of eggs will be available in the spring and a correspondingly large surplus of poultry in the fall and early winter which must continue to be stored for use at later periods."

Summer Poultry Feeding Plan of Ohio Specialist

Summer feeding schedule for laying hens calls for reduction in the amount of grain and increase in the amount of mash, say poultry specialists.

"Gradually reduce the amount of grain feed and increase the mash consumption in order to maintain summer production," says one of the specialists, P. B. Zumbro of Ohio. "It is wise to feed all the grain in the evening in order to make the birds hungrier for mash during the day.

"Another good plan is to keep the birds confined in the house until afternoon, if the house can be properly ventilated. This will stimulate mash consumption and at the same time allow ample opportunity for green feed.

"Another way is to put mash hoppers where you find the birds during the day—under a tree, in a shed, or wherever they congregate.

"Now is the time to start wet mash. Mix enough milk with the ordinary mash to make it crumbly wet, and feed such quantities as the hens will consume in a half hour."

Poultry Notes

Cleanliness is one of the chief factors in success with poultry.

* * *

Keep the coops for the small chicks at a distance from the hen house.

* * *

Now that the warm days have come the young chicks will appreciate plenty of shade and fresh water.

* * *

The nesting boxes should be in the darkest part of the hen house, and should all face away from the door.

* * *

On alfalfa or clover is the best place to raise chicks. Too valuable for that? Shucks, no. An acre, divided in two fields, so the fowls can be rotated, will take care of 500 chicks.

* * *

Skim milk and yellow corn meal are good feeds for young chicks if there is plenty of tender green feed within reach.

* * *

Inbreeding seems to be more harmful with turkeys than any other species of fowls. A gobbler can ordinarily take care of 15 or 18 hens.

* * *

If your hens have nests where the sun shines on them try to get the eggs as soon as they are laid, for one hour's sunshine directly on eggs will reduce the quality. Gather them carefully.

* * *

Sprinkle a little carbolic acid in the hens' dust bath occasionally. After each rain stir the dust and make it fine again.

* * *

Permanganate of potash makes a good addition to the drinking water. Enough should be used to make the water a claret color.

* * *

It is not too late to plant Essex rape for fall feed. Let the rape grow from five to six inches high before turning the poultry in the patch or they will kill it out.

* * *

Growing chicks need plenty of fresh water, a clean range and shade. An orchard that is sodded is one of the best chicken runs.

* * *

The collection of flowering cherry trees that was presented to the city of Washington by Japan in 1912 consists of almost 2,000 trees.

* * *

One of the best foods for making hens lay is lean meat. When the supply of eggs begins to fail, stop all other foods and feed lean meat or liver.

SUCH IS LIFE — A Good Reason — By Charles Sughroe

SO! IN THE MUD AGAIN, ARE YOU?
I TOLD YOU THE NEXT TIME I'D PUNISH YOU
NOW, CAN YOU THINK OF ANY REASON WHY I SHOULDN'T?
YES, SIR! THE DOCTOR SAID YOU WUZNT TO TAKE ANY VIOLENT EXERCISE!
CHARLES SUGHROE

Medieval Versus Modern Student Life

By THOMAS ARKLE CLARK
Dean of Men, University of Illinois.

PROFESSOR ROBERT F. SKYBOLT of the University of Illinois has just made a translation of a series of school dialogues written by one Peter Schade, professor of Greek in the University of Leipzig in 1517. These paragraphs are not intended as a review of the book but simply to show how little the point of view of the modern student has changed from that held by students four hundred years ago. They employed the same tricks in Leipzig in the early Sixteenth century as are employed today—they had much the same round of amusements, the same critical attitude toward their teachers and the courses of study they were required to pursue, and got into scholastic and moral difficulties similar to those the modern Middle West student of today encounters. Translated into present day vernacular the students at Leipzig in 1500 might very well have been walking up John street at the University of Illinois, or in front of the Union building at Ann Arbor discussing the latest show at the Orpheum or picking to pieces the last lecture in Latin 15.

"What are you going to do tonight?" one undergraduate asks another.

"Oh! go to a show, I suppose."

"Anything new in town?"

"Same old stuff we've been used to all year—dancing, a performing bear, you know the kind. You'd better come and go along."

"I'd like to but I'm broke."

"Oh! we can beat our way in. I know the door man, and he'll let us by."

These aren't the exact words, but put into Twentieth century language the meaning is the same. Pleasure and pull were as much in the young fellow's mind then as now.

There was discussion on the food they were getting, which was evidently considerably more meager then than now, for the medieval student had little ready money to spend on anything and depended largely on chance or charity for something to eat. There was discussion of the landlady who was not always to the liking of her lodgers, and there was as much interest in the Christmas holiday as there is today among those undergraduates who, no matter how long the vacation may be, always make a strenuous effort to have it longer.

"This is the day when the committee on discipline meets," one boy says to another as they are walking along the street.

"What do they do?" the other inquires, being newly arrived and not familiar with college customs.

"They bring you to trial for violating some of the college regulations and fire you if you are guilty."

"How can they know what we do; they surely are not so wise."

"Oh! they have spies who follow us around, see what we do, and then report to the faculty."

The statement probably had as much basis of truth then as it has today, or had when I was in college and heard the same things said. No undergraduate has ever given a professor credit for intelligence enough to know what was going on in undergraduate life unless some one told him. We don't change much.

- Delves Into Past -

Washington.—When an American comes down to the Caribbean and begins industriously digging along a coast where pirates once flourished, what is he probably looking for? If you answer "buried treasure" you agree with what the people of Santo Domingo thought when Herbert Kreiger of the United States National museum landed at their island with a request to dig among the shell heaps left there by prehistoric cave men.

Mr. Kreiger had credentials. He is a straightforward person. But—he had a strong chest with his baggage!

The Santo Dominicans remembered that a few years ago a pot of Haitian gold was found on the governor's estate, and they watched the digging American. The strong chest which Mr. Kreiger carefully loaded with bits of broken crockery of prehistoric Indians was examined incredulously. When the visitor sailed for the States with no doubloons and with a perfectly satisfied expression on his face, they were still puzzled.

In his report of the expedition, which Mr. Kreiger has just presented to the Smithsonian institution, he says that the caves of Samana bay yielded some thirty kinds of shells. These represent the remains of seafood dinners eaten by innumerable cave dwellers who occupied the island before modern inhabitants came. Mr. Kreiger also collected bones of birds and animals cast into the refuse heaps of the cave dwellings, and brought back specimens to show the kind of animal life that abounded in this tropical island before Columbus' time.

The task of piecing together the civilization of the prehistoric Indians was made more difficult by the fact that fertilizer concerns have removed large quantities of the shell heaps in collecting bat guano and limestone phosphate from the caves.

"The region is of special interest to anthropologists," Mr. Kreiger reports, "because of the presence of many heretofore unexplored aboriginal village sites and cave habitations."

Army Wives to Cook on Electric Ranges

Washington.—Maj. Gen. B. F. Cheatham, quartermaster general of the army, has just bought 1,900 electric ranges to replace worn-out gas, wood and coal ranges in officers' quarters at army posts throughout the country.

Madison Barracks and Fort Totten, New York, and Fort Hancock, New Jersey, are among the posts where army housewives are to have resplendent new electrical cooking equipment. The electric ranges are of the most modern, up-to-date type and are provided with an automatic heat regulator.

"Back-to-the-Farm" Movement in Mexico

Mexico City.—The Mexican government has appointed a commission to evolve plans for fostering a "back-to-the-farm" movement.

The object is to induce town and city dwellers to settle upon agricultural lands. Study also will be given to the question of colonization by foreigners, and perhaps inducements will be offered farmers of other countries to come to Mexico.

The investigating commission, created at the instance of President Calles, is composed of experts of the departments of treasury and agriculture and the government's agricultural credit bank.

Denies Owning Artificial Arm; Now He Wants It

Montesano, Wash.—Because E. G. "Wienie" Wagner swore that a left arm did not belong to him he is having considerable trouble in getting the sheriff to give it to him. The arm, an artificial one, was found near the scene of a liquor raid and was held as evidence. Wagner, who is minus an arm, is alleged to have dropped it in his flight. On the witness stand Wagner denied ownership of the limb. He was acquitted. Now he is trying to get the sheriff to give it to him.

Pawnbrokers Have Palace for Business in Venice

Venice.—The "three-ball" merchants of Venice live in fine style. No side streets and back alleys for the pawnbrokers of the city of canals; instead they have a palace, one of the best in Venice, all for themselves.

The Palace Corner Della Regina is a fine, imposing edifice built in 1724. Here the pawnbrokers of Venice have their headquarters. They lend money on anything from a tiepin to a merchant ship.

Your Old Straw Lid Always Good in Mexico

Mexico City.—Straw hats and overcoats, either or both, together or separately, are worn the year around in Mexico City, according to individual taste.

There is no fixed date for commencing to wear straws, no dead line when they must be abandoned. More straws are worn in the summer than in the winter, but there are plenty of men here wearing straws on Christmas day, and every day of the year. There are others who never change from a felt.

A light overcoat is needed almost every night of the year, even if the day has been warm. Most persons wear the same weight clothing all the year.

"Now, Let Me See!"

FOR TENNIS COURT

An exceptionally attractive and smart tennis outfit. The felt hat is of navy blue with a white band. The navy and blue and white striped cardigan of chiffon velvet has large patch pockets; and the frock is of white sparrow Chinese damask.

Father Sage Says:

A girl thinks the wisdom of Solomon insignificant when compared with the smart sayings of her first beau.

Going and Coming

The Booking Agent—Did your "Uncle Tom" tent show have a long run on the road?

The Lead—Not a very long run. But, we had a nice little hike getting back.

Took Chances

Mr. Pester—I suppose you took me for a fool when you married me?

His Wife—Well, I took you for better or for worse, not knowing how you'd turn out.

NO EXCEPTION

Grace—"Yes, it runs in the best families." Maggie—"What does?" Grace—"A silk stocking."

A Wise Move

Hewitt—Here is a book telling what to do until the doctor comes.

Jewett—There is only one thing to do—prepare a financial statement, showing your assets and liabilities, so that the physician will know how much he can soak you.

No man is ever so friendless that he can't find some one to jolly him along.

Knock

Departing Guest—You advertise this as the best hotel in town?

Proprietor—It sure is.

Guest—Well, that may be a fine boost for the hotel, but it's a mean knock for the town.

In for It

Dentist—What is your line?

New Patient—I'm a comic story artist.

Dentist (grimly)—Then I'll try to live up to your idea of our profession.

SHE LOVED HIM ALONE

Tom—"Does she love you alone?" Joe—"If she insisted on an audience I'd soon look for another girl."

Hopelessly Dumb

Instructor—Well, do you understand the engine now?

Beginner—Perfectly. There's only one thing I should like to ask: Do you put the water and the gasoline in the same hole?

The United States produced 70 per cent of the world's petroleum supply last year.

Is THIRTY the Love Deadline?

Rupert Hughes was born in Missouri in 1872 and since that time has given plenty of evidence that he comes from the state where they have to be shown. For many years he has been famous for his brilliant novels and short stories. Besides a literary career he once established a reputation for himself as an army officer and as a music critic and authority on musical affairs. He has recently been running a widely quoted series of articles in newspapers throughout the country dealing with modern women and their problems. He is married.

By RUPERT HUGHES

The wise and witty Will Durant is probably so sorry now for robbing men past thirty of the capacity for love that it is almost cruel to speak of it.

The greatest practitioner of his day, Doctor Osler, became famous for what he never said, and people still blandly misquote the Osler theory though he has been dead for years and denied the statement that is glued to his name.

Gelett Burgess wrote a quatrain stating that he would rather see than be a purple cow. It grew so popular that he dashed off another:

Yes, I wrote the Purple Cow,
I'm sorry now I wrote it;
But I can tell you anyhow,
I'll kill you if you quote it.

Doctor Durant may be equally dangerous by this time, but he has not yet denied the appalling words he signed.

"A man past thirty is incapable of love. A man above thirty may go wild over a blonde 'chorine.' That is not love. Love is absolute devotion—the desire to give full service to another."

It would be hard to cram more error and false implication into equal space.

Why is it impossible to love a blonde "chorine?" Is a brunette deaconess necessarily more lovable? As for "absolute devotion" and "full service," numberless court records would seem to show that blonde chorines are able to extract from aged millionaires more devotion, fuller service and self-sacrifice than any other class from any other class.

I have not space nor time to go deep into history but a few dazzling contradictions of Doctor Durant occur to me almost at once.

In the first place, the first man was past thirty when he loved the first woman, for I read in an Oxford catechism written about the year 1400 that Adam, when he was created, was "a man of XXX winters of age."

It was after this time that Eve was created for his express company, and he certainly loved her at first sight. Furthermore, as Saint Bernardino of the same period states, women are cleaner than men, "for woman was made of a fine clean rib while man was made of a lump of clay."

Take a few of the most famous love stories: Antony and Cleopatra, for instance. Surely Antony loved Cleopatra; he gave up victory and all to follow her. Yet he was forty-two when he first met her, and she was about twenty-eight.

Where is there a more pitiful, passionate love story than that of Abelard and Heloise? Yet when Abelard met Heloise he was thirty-eight. She was much younger but her love continued on through life until her death when she was more than sixty, and they were buried side by side. In Murray's words: "There has never been a passion more famous. It was great love."

Contrast with it the almost equally famous romance of Robert and Elizabeth Barrett Browning. He was thirty-two when he met her; she was thirty-eight. Her father opposed the marriage so bitterly that two years later they eloped. His poetic references to her, "half angel and half bird," and her so-called "Sonnets from the Portuguese," written when she was forty, are as glowing with love, as anything in literature. If Browning did not love his wife, and if she did not love him, then nobody ever loved anybody.

Among musicians the devotion of Gluck to his wife was famous. They met when he was thirty-five.

Beethoven never married, but he could love; and his burning letters to his "immortal beloved," his unsterblichle Geliebte, were written after he was thirty-four.

Hawthorne's marriage is among the perfect romances. He was thirty-five when he fell in love.

One might go on and on and prove by innumerable further instances, famous and humble, that men and women can and do know true love when they are past thirty. Doctor Durant to the contrary, notwithstanding.

Help!

A family in Central avenue was having some cleaning done and a very high stepladder was left in one room. Mrs. X—— was surprised to hear a shrill cry coming from this particular room: "For heaven's sake! Some one come here quick and get this child down before he breaks his neck!" She rushed into the room and found her small son perched on top of the ladder. "What is the matter, son?" she inquired.

"Oh, nothing," he answered. "I was just saying what grandma would say if she found me up here."—Indianapolis News.

Northerly Orchards

The most northerly orchards in the British empire—probably in the world—are located in central British Columbia, despite the fact that the temperature sometimes goes down to 50 degrees below zero.

Which?

An English magistrate ordered a man not to speak to his wife or permit her to speak to him for two weeks. Problem: Was the man convicted or acquitted?

Hoover Unites Factions

THE Republican Party stands today united under the banner of Herbert Hoover as it has not stood for many years. Both progressive and old line republicans are solidly behind the Californian, who today looms as the next president of the United States. The final touch in the reuniting of the two factions of the old party was given this week when Hiram Johnson, leader of the progressive forces in California, announced that he was for the Republican nominee and would do all in his power to see that he was elected.

Herbert Hoover has done what Charles E. Hughes failed to do, and what cost him the votes of many republicans of this state. Hoover has secured the unqualifed support of both factions of the great party in this state and in the nation as well.

With this support, and with the votes of thousands of Democrats who oppose the wet policies of the Democratic candidate, Hoover will secure a majority at the approaching election which will surpass even the hopes of his most ardent advocates.

Blessed By Backwardness

ENGLAND and the English people have received an awful blow. No less a personage than Harry K. Thaw, killer and ex-convict, has called the English people backward, a thousand years behind the times, we believe was the statement, and Thaw goes further to say that the English are not a free people. It might be well to say that these statements were made after he, Thaw, had been refused admission to the so-called backward country on account of his unsavory record in this country.

Perhaps England is backward in some respects Particularly in not having acquired a legal proceedure which allows convicted criminals to wander at will about the land. If so, it is a land blessed by its ignorance. Blessed also in not being a 'free people' if Thaw's interpretation of that term means free from legal restraints as this country seems fast becoming.

The public good demands a due respect for the law; a respect which can only be maintained by the strict enforcement of the law. If convicted and confessed criminals are freed on trumped-up insanity pleas or on legal technicalities, the law cannot be expected to be held in the respect in which it should be by the public in general and partcularly the criminally minded.

If America would get a little more backward, according to Thaw's interpretation of the word, and would exercise a little oftener her perrogative of excluding undesirable aliens, the taxpayers of this country would be saved many millions in court proceedure, which might well be spent along other lines.

It Seems O. K. To Us

We have heard so much big news in the past which eventually turned out to be "bunk" that we have a sympathetic understanding of a chap we met this week who refused to believe that the proposed developments along the bay shore including the construction of a line to Redwood City by the Western Pacific were anything more than wild tales which have been circulated in the past and then faded away into oblivion.

But in this case, at least, we believe that the pessimist is wrong. We do not believe that even a fraction of the truth has yet been told, and when the full story can be told it will make the present prospects pale into insignificance.

Big movements are on foot here. Great forces with unlimited capital are working here; working silently and without any show or publicity. What may eventuate we do not know. But we do know that the purchase of large tracts of marsh land, near Redwood City can have no small meaning for the people of this locality.

Nor is the announcement by the Western Pacific that the company will construct a line from this city to San Francisco, an isolated development. To make such a line advantageous to a railroad company there must be a great industrial development here. That development must be on the marsh where land is cheap and where water transportation is also available. Taking these facts into consideration it is only logical to believe that the purchase of marsh lands by a firm of New York capitalists must in some way be connected with the Western Pacific announcements. Taking the two together we have what may be safely considered the beginning of an industrial era here which will surpass anything else which has ever broken on the peninsula. The pessimist and the man who is fed up on "boosting bunk" need only to read the facts to beleive in the future of Redwood City.

REDWOOD PLANT GETS NOTICE IN SAFETY NEWS

Splendid Record of Local Plant Praised In State Periodical

The record of the Pacific Portland Cement Company's localplant in not having had a single lost time accident in a year received a merited recognition in the California Safety News, a monthly magazine issued by the California Division of Industrial Accidents. In an article concerning an outoor dinner given to employees and friends of the company to celebrate the occasion o fhaving passed a year without a lost time accident, credit for the splendid record is given to Harold Powers, superintendent of the plant.

The article in Safety News was in part as follows:

"The record shows that the Pacific Portland Cement Association's plants are pioneers in the west for organized safety. They found, first that to make it successul and efficient it was necessary to start at the top. The executives must do their part, and their part is to put "Safety on the Map," to make it a part of the process of production, and to get back of it and keep back of it so actively that the superintendents, foreman and workmen will know just what the Association proposes to do to help make the plant safe. Without this executive backing, safety organization is a failure.

The general superintendent of the Redwood plant, H. M. Power, has surrounded himself with men of a very high standard in making up his safety oragnization. This personnel represents all departments in the industry, and they are all "Sold on Safety.'

The superintendent is the key to the situation. He can either make or ruin the success of the organization. Mr. Power as impressed his colleagues with the sincerity of purpose that he and the executives are heart and soul with them, and the men under them, in the fight against avoidable accidents, and thus has been created an environment of good fellowship and cooperation in the humane work that is set before them. No wonder this company, with such an organization functioning 100 per cent in Safety First principles, comes through with this wonderful record of one year without any Lost-Time Accidents.

After a fine lunch, the superintendent introduced Will J. French, chairman of the state industrial accident Commission, as the speaker of the day, and he impressed all his hearers with his deep and sincere interest in "Safety First" and the importance of facing the situation as it exists. He said: "There are two fatal accidents each day in California. Two workmen who leave home each morning in good heath will not return at night to their families. There are over a million injuries to workmen requiring more than first-aid treatment on the records of the State Industrial Accident Commission."

Oil Industry Shows Increasing Activity

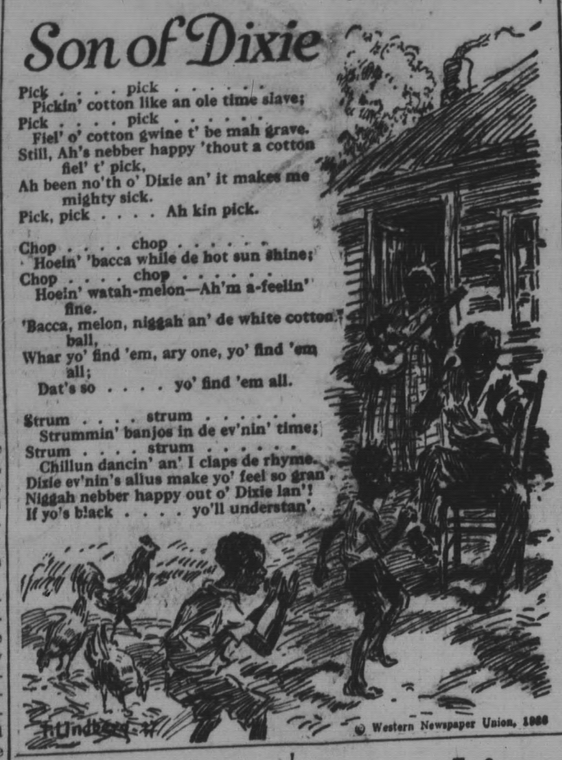
The report appeared in the last issue of the Oil World of a gusher which was tapped by the Shell Oil Company's crew working on the Butts ranch at Purissima. It is claimed by that periodical that when the oil was struck it gushed out of the well higher than the derrick. No official report of the strike was made by the Shell Company, but an increased activity in the county oil fields would indicate that a substantial strike had been made.

A shipment of 45 tons of equipment was made this week to the Nonpariel well of the La Honda Oil Felds Corporation operating on a tract adjoining the Manuel Souza ranch at La Honda.

Songs of Plain Folks

By James Lewis Hays

Son of Dixie



Pick . . . . pick . . . . .
Pickin' cotton like an ole time slave;
Pick . . . . pick . . . . .
Fiel' o' cotton gwine t' be mah grave.
Still, Ah's nebber happy 'thout a cotton fiel' t' pick,
Ah been no'th o' Dixie an' it makes me mighty sick.
Pick, pick . . . . Ah kin pick.

Chop . . . . chop . . . . .
Hoein' 'bacca while de hot sun shine;
Chop . . . . chop . . . . .
Hoein' watah-melon—Ah'm a-feelin' fine.
'Bacca, melon, niggah an' de white cotton ball,
Whar yo' find 'em, ary one, yo' find 'em all;
Dat's so . . . . yo' find 'em all.

Strum . . . . strum . . . . .
Strummin' banjos in de ev'nin' time;
Strum . . . . strum . . . . .
Chillun dancin' an' I claps de rhyme.
Dixie ev'nin's allus make yo' feel so gran',
Niggah nebber happy out o' Dixie lan'!
If yo's black . . . . yo'll understan'.

County Shows Increase In Production

Ice Cream and Milk Show Gain In Year's Record

(By Capito News Bureau)

SACRAMENTO, July 26.—San Mateo County's ice cream manufacturing prowess is keeping pace with the gain in her dairy industry.

Wealth and health are benefitting as the result of the increasing popularity of ice cream and milk in refreshment stands once entirely given over to, "pop" or similar water-base drinks, according to Dr. C. U. Duckworth, chief of the state division of dairy control.

In San Mateo county alone, 23,381 gallons of ice cream were manufactured in the past year as compared with 16,739 during the previous 12 months, while market milk production gained from 1,028,023 to 1,2999,799 gallons during te same two years.

The state production at large also is showing an increase in manufacture of ice cream as the yield of milk increases. While market milk on a state basis gained nearly 15,000,000 gallons to 123,176,641 gallons in 1927 over 1926, ice cream manufacture gained 1,000,000 gallons to 13,078,311 gallons.

Burglar Held By City Police Court

A. Molina, charged with an attempt to burglarize the Main street store of the Ryan Drug Co., was held to answer to the Superior court Wednesday, after a preliminary hearing before City Judge Albert Mansfield. Molina was arrested by Chief Collins and officers when he was found in the act of ransacking show cases in the store. He gained entrance through a rear window.

Molina's bail was set by Judge Mansfield at $2,000. He is now being held at the county jail awaiting trial.

San Francisco—$10,000,000 system of aerial beacons will be erected along Pacific Coast.

Delano—$52,368 contract let for construction of gymnasium and auditorium for high school here.

Phone Lines Extended At San Carlos

$37,600 Investment For Development Of Future Business

The Pacific Telepone and Telegraph Company are now engaged in a cable construction project between San Carlos and Belmont which when completed will represent an expenditure of over $13,600. During the course of the work 7,000 feet of underground cable containing 400 pairs of wires will be placed from the central office in San Carlos to Ralston avenue in Belmont. In addition to 9,100 feet of aerial cable containing fifty pairs of wires will be strung on Waltermire avenue from the Highway to Sixth avenue, and on Notre Dame avenue from Belmont road to Valley View avenue, and on Woodland avenue between Howard Boulevard and Eaton avenue.

In announcing this project L. C. Brown, manager for the telephone company here, stated: "In addition to this project the telephone company has just completed a project between San Carlos and Belmont which represents an expenditure of over $24,000. This work involved the placing of over 6,500 feet of main conduit and 669 feet of lateral conduit. The work also necessitated the placing of eighteen manholes.

"This conduit was placed in anticipation of an underground cable construction project which will be undertaken during the latter part of the year. These two projects, representing a total investent of over $37,600, serve as an emphatic indication of the telephone company's confidence in the future expansion of these and surrounding comunities."

CARD OF THANKS

Save Your Face

It's a scientific fact that a stropped, dull, rough-edged blade pulls and irritates the skin.

Wake up! You want smoother shaves—refreshing, velvet shaves. Abandon old, unsatisfactory shaving methods.

Try the Valet AutoStrop Razor—and you'll stick to it as a face-saver for life. It is more than a safety razor—it is razor and stropping machine in one—a compact shaving unit.

Valet Auto-Strop Razor
Sharpens itself

GUARANTEE
We wish that every user of a Valet AutoStrop Razor be constantly enthusiastic. Should anything happen to yours affecting its perfect service, send it to us for repair or replacement. If your strop is not in good condition—return it for a new one—no charge for either service.

RADIO TALK INTERESTS EXCHANGITES

A talk on radio and its application in 1928 by Dr. Leonard F. Fuller, radio and electrial engineer of the General Electric Co., was enjoyed by members of the Redwood City Exchange Club Tuesday evening. Dr. Fuller's talk was most instructive and one of interest to all the members of te club. The chairman of the meeting was Wilbur Doxsee.

Mr. and Mrs. J. A. Polglase are spending their vacation in Nevada City, their former home, visiting friends and relatives.

Mr. and Mrs. Derenzo leave tomorrow for Westwood, where they will visit Mrs. Derenzo's sister, Mrs. Phil Robertson.

Mr. and Mrs. Elmer Hanson of Yerington, Nevada, spent several days of this week visiting in Redwood City and vicinity.

W. I. Clark of the Times-Gazette force is sojourning in Salt Lake City. He will be away for a month and expects to visit the Yellowstone National Park before returning to Redwood City.

Mrs. Carl M. Fisher of Arch street underwent an operation at the Mills Memorial hospital in San Mateo Wednesday. She was taken to that institution Tuesday. She was reported yesterday to be recovering nicely and will probably be able to return to her home within the next week or ten days.

WOODSIDE

Mrs. William S. Lawson, Jr., of Pasadena, is visiting her mother, Mrs. Bradford Leavitt for two weeks.

Miss May Huddard recently returned from Europe was the guest of honor at a tea on Thursday at the home of Mrs. Nels Andreen. Other guests included Mrs J. L. Ross, Jr., Mrs. J. D. Gish, Mrs. Jas. V. Neuman, Mrs. George Shine, Mrs. Henry Jenkins, Mrs. J. C. Flynn, Mrs. Mervin Mc-Arthur, Mrs. Henry Dalve of San Mateo, the Neuman twins, Barbara and Marion. A short talk about Naples and lovely pictures of it ended a most enjoyable afternoon.

Miss Rita Shearer of Fair Oaks was a week-end guest of Kathleen Gish on Saturday night. They attended the Woodside Fire Department dance at Independence hall. William Leslie Heald and Thomas D. Honeyman of Ravenswood were also of the party.

Miss Irma McCarnie of Healdsburg has been the house guest of Margaret Stewart.

Mrs. Gish and Mrs. Ross were luncheon guests of Mrs. Mervin McArthur on Tuesday at her log cabin. camp on the F. H. Mighall place.

The dance given in Independence all by the Woodside Fire Department was a great success. An orchestra of five pieces was engaged from San Francisco. Fully 200 attended. A contribution box and a splendid appeal by the fire chief, George Dirks, has assured the community that dance may be given once a month.

MENLO PARK

Gone to Los Angeles

Joseph Veverka, the popular local station agent, as gone to Los Angeles to be near the bed side of his mother, who was recently stricken with paralysis and is not expected to recover. P. J. Allen is filling his place here.

Royal Coryell Visiting Parents

Royal Coryel, who has been spending the summer at Los Angeles, is here with his parents. Young Coryell promises to rival Tom Mix in the movie. He is a handsome youth, an expert horseman and trick rider, and the owner of a trained horse equal in docility and cleverness as Tom Mix's famous Tony. One of the big movie concerns is looking to sign up the Athetron Adonis in a profitable contract.

The town council held a short brief meeting of the planning commissioning routine business only and then adjourning to the general meeting of the planning commissions of the peninsula held in Masonic hall. Before adjourning the council adopted suitable resolutions of condolence to be spread upon the minutes and a copy send to Mr. and Mrs. Mark A. McCann, whose young son was killed in an accident Sunday morning.

The members of the planning commissions of Burlingame, Redwood City, Palo Alto, Menlo Park and other peninsula cities met in Masonic hall purusant to an invitation sent out by the chairman of the Menlo Park Planning Commission. There was a good response to the invitations for over fifty persons were in the hall as Fred Metcalf, chairman of the Menlo Planning Commission began the opening address. He explained the objects of the gathering, telling briefly the work accomplished by the local commission and what it had planned to do for the future. Mr. Metcalf introduced A. F. Lemberger, a San Francisco attorney and a member of the city planning commission. He delivered an instructive address in which he warned the people of the peninsula regarding the water supply that the wells going down rapidly and soon would become brakish from the salt water of the lower strata of the bay. He spoke of beautifying the highway from the city to San Jose by eradicating the hidious hot dog stand and unsightly advertising signs.

His speech was heartily appauded. He was followed by Mr. Hayler, the expert employed the Menlo Planning commission and the Burlingame commission, who delivered a very instructive speech saying that the meeting was epochal in that an new era had dawned for the peninsula and much good would result from the gathering. He said that seventy percent of the territory of Burlingame had become occupied and that 40 percent of the Menlo Park area had been built upon and that soon continguous cities would be marged. He warned his hearers to be ware of his emergency and provide accordingly. He said that playgrounds should be provided for and that five acres should be set aside for playgrounds for every one thousand inhabitants. Mr. Hayler called attention to the traffic on the highway showing how rapidly it was increasing and this should demand close consideration.

Norwood Smith of Palo Alto, an enthusiastic member of the planning commission of Palo Alto, told in a lengthy speech what was being done in the College City by the planning commission. He said the commssion was backed by the city council and that the council, this year had appropriated the sum of $4,000 to be expended in the work of beautifying the city. He urged that all the neighboring commissions hold conferences from time to time in order to cooperate in bringing about better conditions in the section. Matt A. Harris, mayor of Atherton, addressed the meeting. He strongly urged that a general organization of the commissons be started in order to secure proper cooperaton in the good work of planning and zoning the peninsula. Henry Witty, president of the Redwood City commission, was next to take the floor. He referred to the traffic problem as one that should enlist the attention of the members. He closed by inviting the members to meet at Redwood City at the call of the chair and that a banquet would follow the meeting. The invitation was accepted and Chairman Metcalf was chosen to call the meeting within the next sixty days.

Dr. Liggett, chairman of the Burlingame commission, was brief in his speech but to the point. He opposed the plan of making the board of supervisors a countyplanning board as he was of the opinion that such work should be kept out of politics. Witte answering the doctor on the point said that District Attorney Swart had decided that the board could not be appointed a planning commission.

J. H. Sullivan spoke in reference to widening the state highway and calling on the members to consider this project as the peninsula grew the expense of doing so later would be appalling. Mr. Metcalf closed the meeting in expressing his thanks for the generous response to the call and announcing that good results would come from the gathering at which glowing expressions of optimism and good feeling was heard.

The maps of the Menlo Park area were exhibited in the hall showing the business section, industrial area and the residential territory.

The maps were highly praised by the visitors.

Senator S. M. Shortridge was in conference with Herbert Hoover at the latter's home on Saturday last, during which time the plans of the campaign were discussed at some length. The senator is a close personal friend of the Republican nominee of years standing. Hoover has great confidence in the senator's oratorical abilities and rely on him to aid in carrying California at the November election. Shortridge was the first senator to announce the candidacy of Mr. Hoover. In the senate he declared in eloquent language that Hoover would be the Republican nominee and would be elected. This declaration was made shortly after President Coolidge gave his amous, "I do not choose to run for president in 1928" message to the people. The Shortridge speech electrified the country and started the machinery in motion that made Hoover a winner at Kansas City. It will be the assistance of such men as Shortridge that will place him in the White House in November.

Menlo Parlor Installs Officers

Menlo Parlor No. 185 Native Sons of the Golden West on Thursnight installed the following new officers:

Senior Past President, Lionel Nunn; Junior Past President, P. F. Blanchard; President, Samuel M. Shortridge, Jr.; 1st Vice-President John W. Morey; 2nd Vice-President, Lambert Borghini; 3rd Vice-President, John Shortridge; Marshall, Al Arellanes; Inside Sentinel, Foster Andrews; Outside Sentinel, George Murry; Recording Secretary, Frank W. Johnson, Financial Secretary, B. G. Larrecou; Treasurer, Roland Midgley.

The officers were installed by District Deputy Grand President Waterman of Palo Alto Parlor, and will hold office for the coming term of six months.

Those desiring to vote at the primary election of August 29 must register on or before Saturday night at 12 o'clock City Clerk F. I. Kurtz will hold her office open this evening and tomorrow evening to accommodate those desiring to register. This is the last warning. Take notice and get your name on the big book today.

St. Dominic began yesterday and ing the next week, many coming from the east and from all points of the state. Conferences will be held in the public chapel on July 29 and 31, and on August 2nd at 4:30 p. m. On the first date Father Acok of St. Patrick Seminary will preach, the sermon to be followed by benediction. Tuesday the sermon will be preached by Rev. Thomas Gabisch and on August 2, Rev. Richard Gleeson, S. J., will deliver the sermon. On other days benediction will take place at the usual hour 5:15. The blessing of the new chapel will take place on Saturday morning, August 4 at 10 o'clock by His Grace, Archbishop E. J. Hanna.

From Saturday, July 28 to August 3 from one o'clock to five p. m. every afternoon the public will be privileged to visit the Corpus Christi monastery here before the Cloistral Restrictions are permanently established. The Novena to will continue to August' Thousands will visit the monastery during the ceremonies a garden fete or bazaar will be held in the gardens of the monastery. A series of "Afternoons in the Cloister" will take place from Saturday, July 28 to August 3. Fancy work, home-made candy, cakes, etc., will be disposed for the building fund. This affair will be a big event in the history of the monastery and the kind sisters and the reverend oter are bending every effort to make it a success and in this they have the earnest co-operation of the people of the peninsula and Menlo Park. All realize and appreciate the good work the sisters are doing for [illegible] acknowledge the [illegible] ings that are nowing [illegible] as a result of their [illegible] ers and sacrifices for the glory and honor of God.

Arrangements have been for the amusement of any who may come.

SAD PASSING OF MARK McCANN JR.

By D. E. O'KEEFE

The grim visage of tragedy has stalked into the happy home of Mr and Mrs. Mark A. McCann of Menlo Park and shorn from it the only son, Mark McCann, Jr. , aged 19.

One cannot contemplate or understand why one so young, so beautiful, so radiant with hope, and high aspirations should be ruthlessly stricken down just as life's threshold had been reached, when the future looked so promising and roseate, but—

Leaves have their time to fall,
And flowers to wither at the north wind's breath,
And stars to set,—but all,
Thou hast all season for thine own, oh Death!

Youth and the opening rose
May look like things too glorious for decay,
And smile at thee,—but thou art not of those
That wait the ripened bloom to seize their prey.

We know when moons shall wane,
When summer birds from far shall cross the sea,
When Autumn's hue shall tinge the golden grain,—
But who shall teach us when to look for thee?

Is it when Spring's first gale
Comes forth to whisper where the violets lie?
Is it when roses in our path grown pale?
They have one season—all are ours to die!

The young man was the idol of his home surroundings, dearly loved by his adoring parents and sister, and admired by his many friends. His sudden death has made desolate that once happy home that he had gladdened by his boyish laughter and pleasant greetings and witty sallies, but it shall know him no more for ever. He has gone. But there is hope and consolation for those left to mourn him in that the separation will not be for all time. It will only be for a while. He will meet them on the other side gloriously and more beautiful than ever. There there will be no parting or dying, no tears or sorrows but bliss and gladness for evermore.

Mark McCann was born in San Francisco but came to Menlo Park as a boy. He had just completed his first year in Junior College at San Mateo, where he had made a record as a student.

Coming from San Francisco early Sunday morning his machine, turned over while turning a sharp corner at Bay Shore and he was pinned underneath the car, dying almost instantly.

The funeral from the Church of the Nativity Tuesday morning was attended by a large number of sorrowing relatives and friends.

Young McCann was his father's hope and pride, and is mother's loving boy. The parents are heartbroken in their sad loss but they may have consolation in know ing that they have the sympathy of the whole community in their bereavement.

STATE ASKS BIDS ON NORTH UNIT OF BAY SHORE

(Capitol News Bureau)

(Special to the Times-Gazette)

SACRAMENTO, July 19—Call for bids for grading and surfacing with oil treated crushed gravel or stone 3.5 miles between San Francisco and South San Francisco was issued today by the department of public works. The bids will be opened August 1.

This work, B. B. Meek, director of the department declared would go far toward completion of the Bay Shore highway, one of the most important projects which the State Highway Commission is undertaking this year.

Santa Ana—$150,000 new two-story business block under construction at Broadway and Second streets.

LEGION MEN ORGANIZE FOR FIRE FIGHTING

Sacramento Leads In Movement For Fire Protection

(By Capitol News Bureau)

SACRAMENTO, July 26.—The men who were first to go overseas for America in the world war auxiliary fire fighting force to today again are turning their patriotism to practical account as an save California's forests and ranges.

Five hundred Sacramento world war veterans have led the way in this movement,, pledging their services when needed subject to the call of State Forester . B. Pratt, who today expressed hope that veterans of Redwood City and other cities near large forested or range areas would follow the example.

Organized in units of 50 men, all fully equipped and assigned to trucks for almost instant mobilization, the egion forces were placed at the service of the state by E. T. Cook, their director of forest fire prevention service.

"If other legion units, and especially in cities so located near large timbered areas, as is Redwood City, will follow suit, California will have a reserve fire fighting force to which none can compare' declare Deputy State Forester W. B. Rider, who with Cook planned details of the auxiliary organization.

The Sacramento Legion volunteer group has been so organized that men may be called out for first, second and third line duty according to their availability H. M. Whitbeck, sergeant of police in the capitol city is in charge of mobilization, and says he can have the entire 500 men under way within less than an hour's time.

"This plan not only insures us men who have the stamina and willingness to fight fire" declared Forester Pratt, "but saves use the deay going into streets and alleys for fire fighters who often prove unfit for duty when we get them on the scene of the fire."

$18,000 IN CASH PRIZES AT BIG STATE FAIR SHOW

Fourteen Events Listed In Night Feature Program, Sept. 1 to 8

Fourteen events with cash prizes totaling $18,000 were announced today by Charles W. Paine, secretary-manager of the California Agricultural Society, as the program for the State Fair Horse Show, September 1st to 8th. When entries close on, August 14th, it is expected that the number of horses scheduled to compete will establish a new Pacific Slope record.

The events are:

Five-Gaited Saddle Horses—Ten classes. Total cash awards, $1,7000 and $1,000 special stake sponsored by Sacramento Clearing House Association.

Three-Gaited Saddle Horses — Twelve classes. Total cash award $2,040 and $1,000 special stake, sponsored by Sacramento Council.

Heavy Harness Horses — Ten classes. Total cash awards $1,-700, and $1,000 special stake, sponsored by Sacramento County Board of Supervisors.

Harness Ponies, Hackney — Eleven classes. Total cash awards $1,870 and special $1,000 stake, sponsored by Hotel Senator of Sacramento.

Fine Harness Horses—Two classer. Cash awards $340.

Roadsters—six classes. Total cash awards $1,020 and $500 stake.

Polo Mounts — Four classes. Cash awards $680.

Hunters and Jumpers — Ten classes. Total cash awards $1,-700 and $500 stake.

Shetland Harness Ponies—Three classes. Cash awards $270 and $500 stake.

Children's Saddle Ponies — Three classes. Cash awards $270.

Draft Teams—Six-horse, $300; four-horse, $175; two-horse $110 single $50.

Musical Chairs—Four classes. Cash awards $240.

Stock Horses—Three classes. Cash awards $495.

Premiums for Stall Decorations —Three classes. Cash awards $150.

A new feature of the Hunters and Jumpers event will be separate classes for Army Officers' Chargers and Enlisted Men's mounts with $170 cash awards in each class.

The State Fair directors in charge of the Horse show are T. H. Ramsay of Red Bluff, chairman; Justus F. Craemer of Orange, and Fred H. Bixby of Long vis Paine, ringmaster.

Hayward—Western Pacific Railroad nearly completes relaying tracks in this vicinity.

BIG PRODUCTION SEEN FOR CROPS OF GOLDEN STATE

Large Acreage And Full Crops Seen This Year Here

(By LAWRENCE MONFORT)

SACRAMENTO, July 26— Miss California, world's greatest and most gracious star, will win fresh laurels and a new contract with her dazzling 1928 agricultural production, "The Horn of Plenty," this season.

It's a great show. The house is sold out for weeks in advance and according to Statistician E. E. Kaufman who presides over the box office, the leading lady should receive a boost in salary as a result of her unprecelented popularity with American and foreign audiences.

It's a record production, both as to augmented cast, talent and scenic investiture, and when it takes the road this fall after prelimintry try-outs, is destined to play for a year to capacity audiences hungry for that quality and nicety of taste which only Miss California can supply.

Nor will it be a "Follies" production, but a solid, substantial performance, guaranteed to satisfy by its backers, the farmers and orchardists who this season are pouring the greatest value of fruit and field crops into their annual venture.

With few exceptions grain, root, vine and tree crops this season will surpass previous years, not only as to acreage but as to yield per acre. According to Kaufman, grains promise unitormly well, with barley topping the list; potatoes will establish new recorls. Apples, pears, prunes, oranges and lemons and almonds promise far greater yiells than in 1927; 150,-000 tons of grapes over and above last season's production is in sight.

Ice Essential To Health Says Physician

Milk, soup and fruit juice, upon which a baby is dependent for nourishment, are foods when they are properly handled and poison when they are not.

That is the assertion of Dr. M. E. Pennington, household refrigeration expert, in an interview on how to get babies safely through the hot weather—a time of low vitality and digestive upsets.

"In the use of ice for the preservation of foods lies the solution to the principal problem of 2,000,-000 mothers of infants in the United States," Dr. Pennington says. "In Alaska, babies die in great numbers for lack of milk and in Mexico, for want of ice. Fortunate for the children of this country, pure milk and abundance of inexpensive ice—baby's two best friends—are available.

"While certified milk is obtainable almost everywhere and soup and fruit juice are perfect when first prepared, all three are highly perishable. No mother should gamble with the lives of her offspring when she can get ice at a cost of a few cents a day and he sure of keeping the food in proper condition. Withot refrigeration milk begins at once to deteriorate even though it is of the best quality and has been kept on ice until delivered at the home."

The cleanest milk obtainable has a content of 4000 bacteria to the cubic centimeter, according to Dr. Pennington. Unless bacteria number more than 10,000 to the cubic centimeter of milk, they are not considered harmful. But in a warm temperature an army of bacteria develops quickly; in 24 hours at a temperature of 60 degrees, 10,000 bacteria will increase to perhaps 1,500,000; in 48 hours to 33,000,000; in 72 hours 326,000,000; in 96 hours to 926,-000,000. Most of these bacteria may represent dangerous diseases, typhoid or tuberculosis. Boiling will kill them for the tie being, but it also destroys the freshness, flavor and some of the food value of milk. Similar bacteriological conditions prevail with other foods.

Dr. Pennington adds that laboratory tests show vegetable soups may be botled and kept safely in the refrigerator for 72 hours, and that meat juices and soups remain in good condition for two or three days. All these foods for the baby should be kept in the coldest part of the refrigerator, the food chamber directly beneath the ice, where the temperature, in a good ice-box, is about 45 degrees.

"Summer heat invariably lowers the vtality of very young children," Dr. Pennington states. "Their digestive systems become unusually delicate, and the matter of nutrition requires exceptional care. A good refrigerator in the home, gept well filled with ice is the one great protection, essential to guarding the health of every infant."

School Growth Increases

(By Capitol News Bureau)

SACRAMENTO, July 26—Young California, bent on an education, no longer limits his cultural aspirations to the lower grades, but needs must have a college education.

At least such is the trend as shown by dairy atendance records for the fiscal year ending July 30, which the state department of education announced today through W. E. Morgan, chief of the division of research and statistics.

A 52 percent increase in junior college enrollment stands out like a beacon to friends of higher education, while elementary school attendance with an increase of 5.44 30, 1927, while high school attendance boost of 10.21 per cent points the trend toward more than common school education when such facilities are made available at home.

Attendance, rated on an average daily basis was 8851 in San Mateo County elementary schools, last year as compared with 8341 during the fiscal year ending June 30, 1927 wile high school attendance for the past year was 2690.

The growth in elementary and high school attendance is the greatest in state history according to Morgan who announced total elementary attendance of 629,696, high school attendance of 199,421 and junior college registration of 4,391 for schools of the state during the year just ended.

Travel Promotes Good Citizenship

What every man should know, according to F. S .McGinne, passenger traffic manager for Southern Pacific, includes all of the beauty spots and natural wonders of his own state.

"No Californian," McGinnis said "can be said to have completed his education until he has seen Mount Shasta, Yosemite National Park, the Golden Gate, Lake Tahoe, Donner Lake ,Catalina, Mount Whitney, Mount Lowe, San Francisco Bay, the Colorado desert, the Monterey Peninsula and at least one of the groves of giant redwoods.

"All of these spots are world renowned. To visit them is inexpensive and they are within easy travel distance of every Californian home. Connoisseurs of beauty journey from far places of the world to enjoy what any Californian may have as the setting for a week-end trip or a vacation jaunt.

"Any man will be a better citizen if he is familiar not only with the region, immediately surrounding his home, but with all the wonders and attractions of the state as well."

STATE FIRES REACHING NEW HIGH RECORD

Loss of Grain Is State's Greatest Loss by Carelessness

(By CLEM WHITAKER)

SACRAMENTO, July 26—For a second successive season, California is enroute to a new record for forest fire losses.

With damage for the first half of the 1928 season in state-protected acreas aggregating $350,-482.85 in forest, brush, grain and grazing destruction, loss of standing grain by far constitutes the heaviest toll and timber losses are less than $10,000.

Such was the report submitted by State Forester M. B. Pratt and today rendered to Governor C. C. Young by Director oNatural Resources, Fred G. Stevenot.

The outstanding fact of California's battle against fire this year, declared Stevenot is that of 626 fires to date in state-partrolled districts all but 20 were caused by man, with careess smokers responsible for 263 or nearly half the total.

San Mateo County fire losses so far this season have been normal with the greater part of the loss confined to grass and brush.

"California has an amazingly efficient forest patrol," Stevenot informed the governor and his executive council. "The executives and rangers of the forest service deserve especial commendation for their vigilance in preventing and suppressing fires. It is significant that gross carelessness and lack of co-operation of their fellows is responsible for the greater proportion of the state's fire loss so far this year.

"California's fire toll can be reduced tremendously. In fact, it can amost be eliminated if the state's citizens and visitors will but take necessary precautions. Great reductions in our annual fire loss bill have been accomplished by the forest patrol within the past few years, but whatever further reduction can be made in the future depends in a large measure on those responsible or starting fires —not those who put them out."

Special Rate Offered Sunday To Santa Cruz

J. Hale Larkey, traveling passenger agent of the Southern Pacific from San Jose was here Tuesday making arrangements ofr a special excursion trip being offered by is company to Santa Cruz for residents of peninsula cities. A special train is being run to Santa Cruz on Sunday. It will leave the different peninsula cities at the following times:

Burlingame, 8:15 a. m.; San Mateo, 8:19 a. m.; Belmont, 8:24 a. m.; San Carlos, 8:26 a. m.; Redwood City, 8:30 a. m.; Menlo Park, 8:35 a. m.; Palo Alto, 8:38 a. m.; Mayfield 8:41 a. m.

A special rate of $1.50 for a round trip from Redwood City is being offered. This is an experiment on the part of the Southern Pacific, and if it proves acceptable to the public similar excursions may be expected in the future.

Arbuckle—$15,000 new office and store building will be erected on Main street.

LOCAL MAN SAVED FROM DEATH BY FIRE DEPT.

Harry Jamieson of this city was almost fatally asphixated Saturday when repairing a leaky gas pipe beneath a house on Hamilton street. Jamieson, an employee of the Pacific Gas & Electric Co., was called to repair a leaking pipe beneath the Hamilton street house. The house was of frame construction and it was necessary for the gas man to crawl along the ground underneath in order to reach the leaking pipe.

The house was that of George Mulcady. Mrs. Mulcady was home at the time, and when the sound of Jamieson working under the house ceased for some time she became alarmed and investigated and found him unconscious. The Redwood City fire department was summonded. Bob Bell responded with an inalator and worked with Jamieson for almost an hour before he was restored to consciousness.

It is thought that the slow leak of gas had overcome the man without his being conscious of the fact. When found his pulse was very weak, and but for the immediate releaf given by the firemen the accident would undoubtedly have terminated fatally for him.

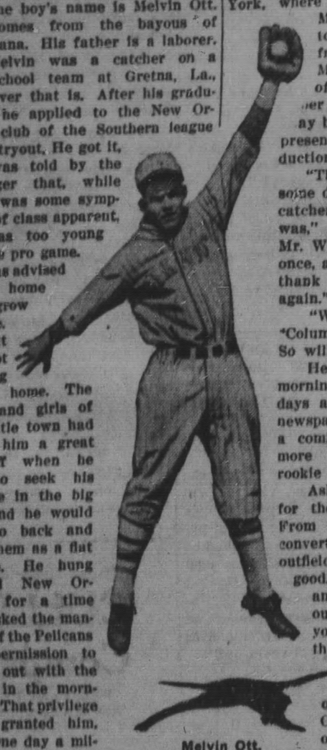
Boy Stars for New York Giants

THIS is the story of a backwoods boy who, at the age of sixteen, got a job with the New York Giants on a letter of introduction, and who today, at the age of nineteen, is standing the baseball world on its head, writes W. S. Forman in the Chicago Evening Post. It couldn't have happened very often in any other country in the world, and it couldn't happen very often in big-league baseball, where a letter of introduction is about as useful as a wart on a girl's nose.

The boy's name is Melvin Ott. He comes from the bayous of Louisiana. His father is a laborer.

Melvin was a catcher on a high-school team at Gretna, La., wherever that is. After his graduation he applied to the New Orleans club of the Southern league for a tryout. He got it, but was told by the manager that, while there was some symptoms of class apparent, he was too young for the pro game. He was advised to go home and grow awhile. But Ott was not willing to go home. The boys and girls of the little town had given him a great sendoff when he left to seek his fortune in the big city and he would not go back and face them as a flat failure. He hung around New Orleans for a time and asked the manager of the Pelicans for permission to work out with the team in the mornings. That privilege was granted him.



Melvin Ott.

One day a millionaire lumberman named Robert Williams, dropped into the Pelicans' park seeking material for a baseball team he maintained at one of his lumber camps. He saw Melvin Ott working out and liked his looks. He offered Melvin a place on his lumber-camp team and Melvin, with nothing better in sight, accepted with thanks.

Now the scene shifts to New York, where the hard-boiled Mr. McGraw, who happens to be a close personal friend of the wealthy Mr. Robert Williams of the Louisiana lumber camps, is greeted one day by a bashful boy, who presents a letter of introduction to his nibs.

"This is Melvin Ott, who some day will be as great a catcher as Roger Bresnahan was," read the letter from Mr. Williams. "Sign him at once, and some day you will thank me over and over again."

"Well," said McGraw, "Columbus took a chance. So will I."

He watched the kid at morning practice for three days and then said to the newspaper boys: "There's a coming star. He shows more promise than any rookie I've seen in years."

Ask any baseball bug for the rest of the yarn. From a catcher McGraw converted Melvin into an outfielder, and he made good. One day Lindstrom and Reese were both out with injuries, and young Ott was sent to third base. He starred there. Recently Andy Cohen was out with the flu, and Ott was shifted to second base. He starred there, too. It is an interesting story. And here is the best part of it. Young Melvin Ott's head is the same size now that it was when he shuffled bashfully up to McGraw with his letter of introduction from Williams, the lumber man. He has developed neither temperament nor temperature.

Pirate Pitching Star

John Miljus, one of the pitching stars of the Pittsburgh Pirates, is more than making good this year, his second season in fast company.

Sport Notes

Harvard was the first American college to introduce modern football.

• • •

Bicycle racing and cross-country runs are still the most popular sports in Belgium.

• • •

Billy Bird, a London bus conductor, has fought 175 boxing contests and lost only 23.

• • •

Benny Touchstone, heavyweight, has knocked out eight opponents in the second round.

• • •

The first steel and concrete grandstand in Japan has been built at Waseda university in Tokyo.

• • •

Dan Leary, veteran pedestrian, nearing the ninetieth milestone of life, makes it a habit to walk at least 15 miles a day.

• • •

Donald Carrick, golfing champion of Canada, has droped golf to train for the tryouts for the Canadian Olympic boxing team.

• • •

Queens university has advanced a plan to have all members of the Canadian Intercollegiate Athletic union pool their football receipts.

• • •

William L. (Little Bill) Johnston, who held the national tennis championship in 1915 and again in 1919, has definitely retired from active competition on the courts.

• • •

When Bob Fitzsimmons fought Peter Maher about 400 miles from El Paso in 1896, there were exactly 132 paid admissions at $20 apiece. Forty-nine newspaper reporters were admitted free.

• • •

Wilford H. Ketz, holder of the Western conference record for the hammer throw, will captain the Michigan track team next year.

• • •

On the famous golf courses of Scotland caddies may be seen at the age of eighty. They appear to know their courses as a mariner knows his charts.

• • •

Intelligence tests will be used by Coach Al Sharpe of Washington university as an aid in selecting his football material, especially quarterbacks, for his team next fall.

DIAMOND PICK-UPS

Pitcher Harvey Reese has been purchased by Raleigh from Richmond of the Virginia league.

• • •

Tiger Stone is making the rounds of the league. Recently he signed with Columbus as a pitcher.

• • •

Charles Martz, Cincinnati, will captain the Wooster college baseball team next season. He is a star infielder.

• • •

Art Jahn, Phillies outfielder, got his start in baseball by answering an ad for ball players in a paper at Alverdo, Iowa.

• • •

Billy Mullen, third baseman, has been purchased by the Kansas City American association club from the St. Louis Americans.

• • •

Pid Purdy, who is playing a nice game for the Reds this year, belonged to the White Sox once, but wasn't thought much of.

• • •

Young Doc Leggett, whom the Cubs farmed out to Reading, is still burning up the International league. He's leading the circuit.

• • •

Ty Cobb, member of the Philadelphia Athletics, is forty-two years old and has been playing major league baseball for 23 years.

• • •

Jimmy Welsh, Giants' outfielder, still carries with him a card of membership in the St. Louis Knotholers' Gang. It is dated 1915.

• • •

Del Bissonette, the National league's rookie home run sensation, tried and failed to break in with the big show with Cleveland as a pitcher.

• • •

Outfielder Snead Jolley was the first Pacific Coast league player to reach the 100-hit mark this season. Major league scouts are watching him.

• • •

Bennie Oosterbaan, Michigan's famous modern athlete, made 24 hits in 49 times at bat for an average of .489 during the last Conference baseball season.

• • •

The new Oxford dictionary has 414,825 words. This includes all the known words in the English language, except the ones used by baseball writers.

• • •

Cy Young, pitching immortal, hurled 'em over the plate for 22 years, and during that period had three no-hit, no-run games to his credit, and one perfect game.

• • •

Fred Francis, the Giants' new announcer at the Polo grounds, developed a strong voice as a kid shouting in Mammoth cave, Ky., just for the fun of hearing the echoes.

• • •

Perle Casey has been connected with the Pacific Coast league since it began as a six-club organization in 1903. He has seen service as player, scout, coach and umpire.

• • •

John M. Drew has four former baseball managers on his staff this season—Roger Bresnahan, Bob O'Farrell, Larry Doyle and Bill Terry.

• • •

"Virginia" Reil, right-handed pitcher with the Wilson club of the Virginia league last year, has reported for service with the Nashville club.

• • •

Del Bissonette, Brooklyn's slugging first baseman, regarded as a possible successor to Babe Ruth in home run hitting, is a discovery of old Larry Sutton, dean of ivory hunters.

HOLLAND FAVORS BASEBALL GAME

Efforts Being Made to Popularize American Sport.

Characterizing honkbal, or baseball, as "de ideale zomersport" (the ideal sport of the summer), the Dutch athletic clubs are making a determined effort to popularize American baseball wherever Dutch is spoken. The pitcher of the Ajax team, which played a practice game recently against the American football eleven, is even going to Batavia, Dutch East India, soon in the hope of introducing baseball there.

"Honkbal" was brought to Holland some 15 years ago by an Amsterdam teacher of sports, G. Grase, who had seen the game played in America, but who then had not taken the trouble to familiarize himself with it thoroughly. Returned to Holland, he suddenly realized that Holland had no summer game comparable to soccer football for the fall and spring.

So he and a group of Dutch enthusiasts sat down to study baseball from Spalding's rules. They got most of it right, except that the pitcher threw the ball underhanded.

One day an American man-of-war anchored outside Amsterdam. The Honkball Bond (baseball federation) asked the bluejackets to play them. It was then that they learned how a ball may be pitched. The marines also willingly taught them other fine points.

After a few years interest lagged, and only eight years ago was baseball taken up again. Two years ago the United States cruiser Pittsburgh visited Amsterdam, and a series of games was arranged. That gave new impetus to "honkball," so that by today there are some 10 clubs in Amsterdam with 21 nines, one in Haarlem and one in Hilversum playing baseball.

A Dutch audience reacts differently to baseball from what an American does. While in the United States the spectators in the bleachers seem happy when a ball is hit there, and men vie with one another to catch it, everybody in Holland within apparent reach of the ball ducks as it approaches, and there is great commotion.

Former Champion Jockey Loses 100 Races in Row

The champion jockey of England for many years, Steve Donoghue, has struck a poor track this season. On April 10 at Birmingham he won on Au Revoir, and when he was beaten with Tactics at York recently the world-famous rider chalked up his one hundredth consecutive loser.

During the years 1914-23 Donoghue headed the list of winning jockeys in England, and the slogan, "Come on, Steve!" was heard on every course. It is no longer heard. The originator of that catch phrase is said to have been J. C. Galstaun, an Indo-Armenian, who used to visit England each summer and back, selling platers heavily.

Wisconsin U. to Build $650,000 Field House

Construction of a $650,000 field house at the University of Wisconsin has been assured by Governor Zimmerman's approval of a lease for the site.

The University of Wisconsin Building corporation, a private group within the university, will borrow $326,000 from the state teachers' retirement fund to pay for building material and labor.

When the building is completed it will be leased back to the board of regents for an approximate rental of $20,000, the lease running for fifty years.

Louis Meyer Unknown in His Own Home District

When Louis Meyer of South Gate, a Los Angeles suburb, won the Indianapolis Motor Speedway race, he was almost totally unknown in his home district.

Few people in Los Angeles had ever heard of the youth before newspapers announced his victory.

So slight had been the expectation that he would win the classic that newspapers searched their libraries in vain for pictures of the winner.

It was recalled that he had entered as a driver in one Los Angeles race and had failed to qualify.

Rommel Seeks Record

Eddie Rommel, "ace" of the Philadelphia Athletics, is anxious to win 30 games this season. This feat has not been accomplished for many years and Rommel believes it would bring him into the world's series. He is hurling great ball for Connie Mack.

Tough Proposition

Joe Dundee, welterweight champion who ran out of a match with Ace Hudkins in Los Angeles last year when Ace was in the ring, is likely to meet just as tough a proposition this time in Sammy Baker. Baker is a fierce body puncher. The fellows who stay to a decision with Sammy sometimes drop out of sight afterward. Dundee wouldn't be missed much. He was a rough fighter before he became champion, and he's been a cautious business man ever since.

CALIFORNIA NEWS BRIEFS

Refund of $4,500,000 to the State of California in a lump sum will be sought at the next session of Congress by Governor Young's Curry flood control bill committee. At its session in the office of A. R. Heron, director of finance, a few days ago, the committee named Wm. P. Dwyer, Fred Kliesen and State Senator Frank S. Boggs as a sub-committee to plan utilization of this refund.

Daily airplane passenger service between Portland and San Francisco will be put into effect August 1 by the West Coast Air Transport Company, Charles V. Eakin, president of the firm, has announced. The company has been operating on a tri-weekly schedule, but with delivery later this month of two new Bach monoplanes of the eight passenger type, sufficient equipment will be available for the new service.

The forest fire situation in California was reported to be improving a few days ago by forestry officials, although several blazes are being brought under control with difficulty. More than 100,000 acres of brush and forest land have been burned over in the state. New fires are reported in Fresno, Tuolumne and Placer counties. Santee, near San Diego, is said to be directly in the path of a blaze.

Warning that "use of mussels on the California coast during the summer months is always connected with some danger" was issued last week by the State Department of Public Health. Calling attention to the fact that 102 persons were poisoned and six died from eating mussels a year ago this month, the department's warning said that "poisonous mussels cannot be distinguished from sound mollusks either by appearance or behavior on cooking."

Approximately $1,000,000 already has been pledged privately toward matching the proposed $6,000,000, state bond issue for development of a comprehensive state park system, it was announced a few days ago by Colonel Charles B. Wing, chief of the division of parks. Surveys now are being made by Frederick Law Olmstead, the commission's park expert, Wing said, as to the desirability of various properties suggested by local interests for state park purposes.

There were 23,12,315 motor vehicles registered in the United States at the beginning of this year. This represents an increase of 5.1 per cent of the registration for the year previous. Seven states had more than a million registration in 1927. They were New York, 1,937,918; California, 1,693,195; Ohio, 1,570,734; Pennsylvania, 1,554,915; Illinois, 1,438,985; Michigan, 1,154,773; Texas, 1,111,407. Indiana with 813,637 was the next in line.

How many blonde flapper twins are there in California? Do gentlemen really prefer them? Anita Loos seems to have proved the popularity of blondes, taken one at a time, but the state government, it was announced last week, intends to test them in pairs. The relative attractions of blondes and brunettes will be determined at a state-wide twin contest to be staged during the state fair, the gentlemen in this case being the exhibit judges of the 1928 exposition. State prizes are to be awarded for the prettiest blonde twins, the most captivating brunette twins, the oldest twins, the youngest twins, the twins most resembling each other and the family with the most twins.

The State Tax Commission presumably will recommend to the next Legislature a tax on banks measured by their net incomes from all sources. This, W. J. Carr, a member of both the tax and state railroad commissions, declared in an address in Los Angeles at the University of California at Los Angeles last week. The commission was appointed by Governor Young to investigate and report on the tax problem after the 1925 law that intangible securities should be taxed only on seven per cent of their assessed valuation was complicated by an amendment passed by the 1927 Legislature and then declared unconstitutional by the State Supreme Court.

California has 833,508 pupils enrolled in public elementary and secondary schools, an increase of over 50,000 or 6.1 per cent, as compared with the 1926-27 year, it was announced a few days ago by Walter E. Morgan, chief of the division of research, state department of education. Morgan said the school attendance gains indicate that "the temporary check to California's population increase experienced between 1924 and 1926 has been overcome." The elementary schools have an enrollment of 629,696, an increase of 5.44 per cent; the high schools have 199,421 in attendance, a jump of 10.21 per cent and the junior colleges have 4,391 students, a gain of 52.04 per cent.

Byrle F. Babcock, secretary of the Sacramento Lions' Club and officer of a Sacramento investment company, last week, was appointed deputy state director of finance. Announcement was made by Director Alexander R. Heron and former Senator Lyman King of the Department of Finance.

State Treasurer Charles S. Johnson last week supervised destruction at the municipal incinerator of bonds drawn for $8,028,147.55. The bonds, bearing date of 1927, were originally for the financing of the Secramento San Joaquin reclamation district but had never been sold.

California women are becoming air minded. Reports of the Western Air Express released recently show that five mothers with babies in their arms and one woman 80 years old were among the 1425 paid passengers carried in the company's planes during June. Approximately one-third of all passengers taken aloft were women, the report indicates. Demonstrating the increasing popularity of over water flying, 531 passengers hopped from Wilmington to Catalina last month in the Pacific marine division's flying boats, a service operated by the Western Air Express.

California's Encyclopedia of Political Information, the "Blue Book," came off state presses a few days ago. In 562 pages, larded with illustrations, it carries state, county and city information and a list of all governmental officers. Each legislator will receive free 26 copies, the Governor 50 and others may get theirs at $2 a copy.

Nearly one thousand thoroughbreds, comprising some of the best blooded stock in America, have been entered in the second annual Palo Alto Horse Show which opens with a matinee performance in the peninsula city August 4. The preliminary classification and prize list for this year's show is in the hands of exhibitors and carries $22,000 in premiums. Ninety-seven classes will be shown of which fourteen are stake events of $500 and $1,000.

Releasng State Librarian Milton J. Ferguson from state service to assist in planning a library program for the Union of South Africa, Governor C. C. Young recently named Miss Mabel R. Gillis as chief of the state library during Ferguson's absence. Ferguson sails from New York this week for England, where he will be joined by S. A. Pitt of Glasgow, his British associate in the South African work, which is to be carried on under auspices of the Carnegie Corporation.

California ranks with Washington, Oregon and Nevada among the ten states having the highest divorce rates in the country. The honor, if you want to call it that, of being the group champion in high divorce rates goes to the three states of the Pacific slope. That, at least, is what the United States Department of Commerce says in a statistical announcement received a few days ago by state health officers.

Gov. C. C. Young intends to hold down State expenditures in his budget to be presented to the legislature this winter, and he doesn't want "any material increase in public revenues" beyond absolute State needs. Notice to this effect was formally served on the State Tax Commission last week by the Governor. Conservation of the existing State treasury surplus and equalization present tax burden were given as his policies.

Increases in arrests for robbery, burglary, arson and several other crimes were announced last week by Clarence S. Morrill, superintendent of the State Bureau of Criminal Identification, in a report covering the crime situation from 1923 to the present time. Arrests on all charges for the fiscal year totaled 40,938, setting a new State record. There were 21,722 in 1923-24 and 31,074 in 1926-27. Thought arrests for first degree burglaries had mounted to 2,822 for 1926-27, this was eclipsed by a total of 3,512 for the fiscal year just ended.

San Francisco and Oakland were the two most prosperous cities in the country, relatively, during the month of June. The figures are revealed in tabulations announced by the Standard Statistics Company of New York. The increase is much larger than that reported by any other American city. The month's business volume was 135 per cent above the average for 1920-24. California also was the most prosperous of the States, with its business volume reported 112 per cent above the average and 40.4 per cent over June of last year.

From five counties more than 60 per cent of the signatures required to place the anti-prize fight initiative measure on the November election ballot were received a few days ago by Secretary of State Frank C. Jordan. Petitions bearing the signatures of prize fighting in California are now on file at the Capitol. Of these 63,748 came from Los Angeles county and the balance from Fresno, Butte, Humboldt and Glenn counties. With reports from San Francisco, Alameda and other large populations counties yet to come, qualification of the act to repeal the present professional boxing law was declared to be certain.

Close the forests for the summer and save California from a desert fate. That is the advice to Governor C. C. Young from J. Walter Scott of South Pasadena, who is concerned over the large number of forest fires in the state. Issue a proclamation closing the forests; following the example of President Lincoln when he freed the slaves by proclamation. That is Scott's counsel. "Why should the government of California," asks Scott, "take a chance of becoming a desert, that a young generation from the East should joyride in its forests all summer. They could surely see enough in the winter months.

First initiative petitions for the proposed law prohibiting the "bull-dogging of steers, riding of bucking bronchos and using spurs at rodeo performances were filed with Secretary of State Frank C. Jordan at Sacramento last week. The petitions bore a total of 11,556 signatures, as follows: Santa Clara county, 2,598; Kern, 491; Riverside, 338, and San Diego, 8,139. August 7 is the last day for filing initiative petitions. A total of 91,529 signatures is necessary in order to qualify any measures for the November 6 ballot.

A hundred private detectives and as many specially employed truck drivers are engaged in the greatest foreclosure auction in which California has ever engaged—seizure of 1,000 trucks and buses belonging to 150 owners who have not paid taxes. Under the direction of Deputy Controller Claude Cooper, seizure of more than 200 vehicles in the San Francisco bay region and 800 others throughout the state is slated, unless owners pay the 4½ per cent gross revenue taxes imposed on passenger buses and 5 per cent on freight trucks.

California's new law for the regulation of barber shops has been the subject of only three complaints since it went into effect. Yet it has resulted in the closing of 166 shops on cleanliness rules and kept 402 barbers who use drugs or carry communicable diseases from working at their trade. These facts were sent by C. E. Rynearson, secretary of the state board of barber examiners, to Benjamin S. Moody, Los Angeles barber, who recently complained to Governor Young that the members of the board are not fit judges of barbers.

Matter of Propriety Has Wide Variation

Customs of propriety among people inhabiting various portions of the earth differ widely and are often puzzling to strangers, observes the Detroit News. For example, a native of the Naga hills, British India, told an Englishman that it was not correct to use a poisoned arrow except to shoot at a woman. On the Palau islands, and among all Moslems, it is an insult to a man to ask about the health of his wife, and a man may strike with a stick or a stone, but not with a cutting weapon, anyone who utters a former wife's name. In German Melanesia a visitor is at once presented with betel and food by his host, but he gives back a portion of it as security against poison. The Indians of Central America are shocked at the quick actions and loud talking habitual to Europeans, and think them signs of low breeding and lack of culture. Some tribes allow no singing.

Want American Goods

Indicating the widespread demand for American products, the Department of Commerce says Iceland is inquiring about American radio sets, phonographs and musical instruments; Colombia, cement, rice and barbed wire; Mexico, incubators, hospital beds and sewing machines; Germany, magazines, tobacco and hand driers; Nova Scotia, fire brick, wagons and washing machines.

It doesn't require much effort to grumble.

It May Be *Urgent*

When *your* Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

A farmer says the most difficult thing he ever tried to raise was his mortgage.

HUSBAND DISTRIBUTES BOOKLETS

Wife Tries Compound

Every year the Pinkham Medicine Company distributes about 30,000,000 booklets from house to house. Mr. Ted Hinzman does this work in Lodi, California. His wife writes: "It was in these little books that I read about so many women being helped by the medicine. I thought I would give it a trial and I can truly say that it has done me good. My neighbors and friends ask me what I am doing to make me look so much better. I tell them that I am taking Lydia E. Pinkham's Vegetable Compound."

HEADACHE RELIEVED . . . QUICKLY

Carter's Little Liver Pills Purely Vegetable Laxative move the bowels free from pain and unpleasant after effects. They relieve the system of constipation poisons which many times cause a dull and aching head. Remember they are a doctor's prescription and can be given with absolute confidence to every member of the family. All Druggists 25c and 75c Red Packages.

CARTER'S LITTLE LIVER PILLS

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word *genuine* printed in red? It isn't the genuine Bayer Aspirin without it! A druggist always has Bayer, with the proven directions tucked in every box:

Bayer-Tablets Aspirin Genuine

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Mosquito Bites HANFORD'S Balsam of Myrrh

Money back for first bottle if not suited.

CHAPTER X—Continued

—16—

"In a few minutes I went back to my regular work. Then Mr. Grosvenor was found unconscious. And he was so badly hurt! It made me ill. The sight of blood always makes me feel faint; I have a refined nature. And his wrist was so badly slashed! And presently I suddenly remembered that that yellow paper in my pocket had been all cut into slivers, too! I was so scared I absolutely didn't dare throw it away. I realized it must have been slit up during those three or four minutes I was away from the professor, because when I laid it down on the pile of four books, it was just as he had given it to me. I was so frightened I didn't know what to do, for days and days! It did seem terribly exciting that I should have picked the note up; and presently I felt that maybe I could solve the mystery of the attack with it—"

"What led you to think that?" interrupted Mr. Almy, interestedly.

"Why, you did!" confessed Daisy, coyly. "Don't you remember that day you interviewed me up in Mr. Roberts' office? When I told you all about Miss Grosvenor and Mr. Burton? I could see you thought I had more information than anybody; I knew it was useful to you, no matter how much Mr. Roberts tried to squelch me. And I did have more information than anybody, so when I—"

"Pray, Miss Abbott," interposed Mr. Almy, "proceed, in reference to the yellow note."

"So, when," repeated Daisy, incisively, "I read in the paper that the weapon used to attack Mr. Grosvenor must have been a small, thin blade, I felt sure it had been also used to tear that paper, perhaps to try the blade first. But I couldn't understand the cuts in a pattern on the paper; and Miss Grosvenor wasn't arrested; and, of course, I was sure Professor Harrington had had nothing to do with the affair, so I decided that Mr. Case must have known Mr. Grosvenor and done it!"

Mr. Roberts and I gaped. Mr. Almy merely said: "Let me hear your theory, please."

"Well, Monday noon Mr. Case was dreadfully cross to Ulysses, right in front of me. And you know he's never cross, least of all to a person like Ulysses. We were both in Mr. Case's office, he and I; I was writing a letter for him. Ulysses came in and asked him some question about the shelves he was putting up in the stockroom, and then he started to gossip about the accident.

"He asked Mr. Case if he knew the old gentleman; and Mr. Case said that though a number of the staff reported having seen him before from time to time in the shop, he had never happened to. Ulysses then asked if the old gentleman was going to recover; and Mr. Case said the doctor thought not, he had lost so much blood. Ulysses said that was different from the old days, when they bled people on purpose. He told us his father had had pleurisy when he was a boy, and had been bled by a powerful fine doctor from the navy and got well right away. I said, 'Your father wasn't a sailor, was he?' and he said: 'No'm, the doctor was visiting his folks down to Elliot's Crossing. My father he used to live there.' He said Elliot's Crossing was in Virginia, and when I asked him what it was near, he said, 'It ain't near nothing 'cept the woods and the mountains. I was born there at midnight 'tween October and November, and my horoscope was cast. And the horoscope says that folks that's born at midnight 'tween October and November gets messages. An' I got a message this mornin'. I knowed somep'n powerful bad was go'n happen, and it done happen!' And then Mr. Case told him sharply he was a superstitious old fool!

"Well, then, naturally, he went away; I was sorry for him, but he did give me the creeps with his bleeding and his woods and mountains and horoscopes. I didn't understand him at all, but he scared me to death. And I got scareder and scareder about that yellow note with the slits in it, until finally I just made up my mind that I wouldn't have anything to do with it. So I went and stuck it into the most unlikely looking book I could find in the history section!

"Oh, it was so terrible!" shuddered Daisy. "I finally decided Thursday morning that I ought to try to find it and give it up, after all. And I couldn't remember what book I had put it in; that is, I couldn't remember the book by name. I was scared just absolutely stiff. I knew I shouldn't have hidden the slip, for it wasn't mine, in the first place, and if I suspected it was important, I should have told some one in authority. And then, gradually, the more I thought about the thing, the more I realized that Mr. Case hadn't responded at all to Ulysses; in fact, he'd shut him up much too quickly.

"And then, that same Thursday, I suddenly remembered, without any warning—you know the way you do sometimes when you're thinking about a thing very hard?—that I had seen Mr. Case walking along the south gallery, to the door that leads upstairs, on Monday morning, just before the clock struck eleven!"

"Why didn't you ever say so before?" demanded Mr. Roberts, evidently as much stunned as I was—and maybe as Mr. Almy was—at this totally unexpected corroboration of Julia Grosvenor's statement that she had seen Mr. Case in the same place at the same time.

"I never thought of it again until that minute!" cried Daisy, sharply. "Why should I? And why shouldn't Mr. Case walk along the south gallery? He does, every day, nearly! But I had remembered that the attack was said to have been made shortly before eleven o'clock, and that made me uneasy, taken in connection with the way Mr. Case had lost his head before Ulysses. And then he got me a wonderful position in Fernald's; I couldn't help wondering if he had done it to put me under obligation to him, because I had heard him and Ulysses."

"Have you anything further you would like to tell me, Miss Abbott?" Mr. Almy inquired. "That is positively all you know about the yellow note?"

"Absolutely!" vowed Daisy, solemnly.

So she was permitted to depart.

CHAPTER XI

The Spring-Lancet.

When Ernesto's box trees were half a block away, Mr. Almy said:

"Suppose you take back this key and the bookplate. If at any time you think they might get a response from Miss Grosvenor, show them to her. I give them to you because she associates you, rather than me, with that book, and you might have a chance to win her confidence more adroitly. Once more, do your best to get her to talk."

We passed the box trees; we paced the blue-and-white tiled hallway; we mounted the steep staircase to the second floor, and approached the door of the Grosvenor apartment. And—

Out of it walked Mr. Case!

I decided that the hall was too dark for me to see him; what Mr. Almy did, I don't know, for he was behind me, but at all events, he didn't speak. The maid admitted us to the living room; and there sat Julia, in the same chair where we had left her the previous evning, so still that it seemed as if she had never moved.

"Miss Grosvenor, we want to do something for you, if you will only let us," said Mr. Almy.

"Nobody can do anything for me," she answered in a dead, level tone.

Mr. Almy glanced at me.

"You're mistaken," said I, rather bluntly, to rouse her. "I should not have dreamed of intruding here if I could not help you. You see, I was here last night when you and your cousin had that discussion—you remember you asked me to stay?—and I think I have here what you were discussing with him, that object you want."

I took the key from my bag, and held it out to her. She looked at it with perfect blankness, her expression changing from bewilderment to disappointment, then to suspicion.

"What is it?" she demanded with some asperity. "I haven't the faintest notion!"

I flung it down on the table, and drew the bookplate out of my bag.

"Is this what you want, then?" I asked.

Her eyes fairly blazed with recognition! With trembling fingers she snatched it from my hand, hesitated almost imperceptibly one instant as if screwing her courage up to a supreme effort, then turned the stout paper oblong over and scanned the blank back avidly. Then, with a heartrending cry of bitter disappointment, she flung the bookplate on the floor.

Mr. Almy snatched it up.

"Miss Grosvenor, you recognized this!" he announced sharply. "You saw it at the auction galleries in Richmond, a week ago last Thursday."

Julia Grosvenor caught her breath sharply, half in chagrin in having betrayed herself so utterly, half in consternation at Mr. Almy's information.

"You wanted to buy the book with the bookplate, didn't you? Surely there was no reason why you should not have done so if you wished."

"Yes," she finally whispered; "but I had no money. So I really went to see who would buy it—where it would be afterward."

"Your cousin entered a bid for five hundred dollars," resumed Mr. Almy. Julia made no sign or movement. "But, as you know, he was outbidden. Mr. Burton got the book. It was in Darrow's shop last Monday." She gazed steadily at the floor, in dead silence. "Miss Grosvenor, I must remind you that the authorities are still waiting for you to explain your presence at that shop on Monday morning for an hour and a half."

"I have explained it! You won't believe me! You think I followed my grandfather there to kill him!" suddenly blazed the girl, frightened and furious.

"No," denied Mr. Almy, very quietly, "I think you went there after that bookplate again. But you didn't find it, and something else happened. What, I am going to find out. Miss Grosvenor, when did you learn that Mr. Burton was Darrow's buyer?"

"When I left the auction, directly after the book had been bought, I made inquiries," she answered reluctantly.

"Did you tell your cousin that Burton had bought it?"

"No. I didn't even meet him in Richmond. If he knew, he must have found out from the galleries."

"He did," rejoined Mr. Almy. "Your constant avoidance of your cousin while both of you are attempting to get possession of this drawing makes certain only one conclusion. Miss Grosvenor: Your motive for wanting

Turned the Stout Paper Oblong Over and Scanned the Blank Back Avidly.

it conflicts with his. Now, your cousin went to Darrow's Monday morning and bought a book. Did you see him there?"

"No."

"Did you at any time during that morning know he had been there?"

The question startled her, but she looked at her questioner steadily and answered point-blank, "Yes!"

"How did you know?"

"That," said Julia in a tone of finality, "I cannot tell you."

"Why did your cousin go to Darrow's Thursday night?"

"Perhaps for the book again," said Julia, in pathetic desperation.

"You know better than to say that," said Mr. Almy, with a touch of sternness. "What obligation are you under to him?"

"He has often treated me with consideration; not too many people have," returned Julia, with dignity.

Mr. Almy looked at her hard and shrewdly. Suddenly he shot out:

"What did he go to Darrow's to get for you on Thursday night?"

Her eyes dilated with surprise and horror. She shuddered, and gasped:

"For me? For me? Well, if he wants to tell you, let him! There are some things I can't do!"

Her lips snapped shut just as they had done the previous evening in that very room, when, after all the abuse she had received at the hands of her cousin, when it was utterly useless to try to withstand the search for him, she would do nothing to betray him. Her loyalty was again making faithful return for treachery. Equivocal as her position was, she was so admirable that, forgetting all about Mr. Almy, I broke out uncontrollably:

"I heard your cousin last night, you know. He offered you a 'liberal settlement' in exchange for something he wanted. He treated you with great contempt, in such contrast to . . . others, almost strangers to you! They proffer you their aid freely; why do you spurn it just as you have spurned his offer?"

"I'm not ungrateful! I'm not!" cried Julia, clenching her hands. "But . . . you see, it's different. What Charles offered me was a bribe out of my own money, for all I know!"

She had started to talk, at last! And not because of my appeal, but because I had unwittingly hit on a grievance. But Mr. Almy was quite indifferent to cause, being interested only in effect:

"You think you have a legal claim on property your cousin calls his, do you, Miss Grosvenor?" he demanded swiftly.

"I do!" she cried, intent on her wrong. "Otherwise why should I have been ignored and rebuffed so pointedly all my life? If I had really been of illegitimate birth, if I had no claim on the estate—which was all my grandfather cared about, except Charles, and everything in the world that Charles himself cares about—why should those two men have spent their time trying to safeguard themselves by repudiating me?"

"Did you ever do anything to try to prove your claim?"

"Not until the last fortnight. You know I've been home from abroad less than a year; and I came to the conclusion I've just explained, only a few months ago, and gradually."

"And how did you try to prove your claim within this last fortnight?"

With a groan, Julia cried:

"I went to Richmond!" and then fell upon a despairing silence. The grievance had cut deeper. In a minute, Mr. Almy asked gently:

"Why did you go there?"

"It's such a long story!"

"Take your time. Just begin at the beginning, and go on."

"Well," began Julia, wearily, yet with a sort of relief, "a week ago last Tuesday evening I was reading the paper to my grandfather, as I sometimes did. He liked especially to hear all the news of book sales and auctions. And I read the notice of the auction of Judge Leavitt's library in Richmond, the coming Thursday. Of course the sale of a Virginia library was of special interest to him, particularly as this notice named many important books."

"Among them, no doubt, Clarihew's 'Notes?'" inquired Mr. Almy.

"Yes; it was the last on the list, and it seemed to interest him especially."

"Did he say anything?"

"Not until I had finished reading the description of the book, or rather of the bookplate, for the book was briefly described as a clean copy in good condition. But of the bookplate the notice said: 'Pictorial bookplate inside first cover. No owner's name. Undated.' And I saw he was very much interested in the whole description, so I said, in perfect innocence then, I ought to mention: 'You know I'm going to be in Washington anyway for the studio on Wednesday—' I was taking down some designs for a church window there— 'and I can easily go over to Richmond, and buy that book for you on Thursday, if you want it.' To my utter surprise, he was much startled; for a second he seemed suspicious and angry; then I saw him glance at Charles—"

"Oh, your cousin was present, was he?" put in Mr. Almy.

"Yes, we were all in this room. Charles was studying at the other end of it. And then my grandfather suddenly changed his attitude and said, very pleasantly, that he was much obliged to me, but I had better simply attend to my employers' business, he thought; anyhow, he didn't know how suitable it would be for me to go and bid alone at a public auction in a southern city. But he admitted, frankly, that the sale did interest him; and turning to Charles, he asked him if he could arrange to go for him, as he had done, by the way, on a number of other occasions when my grandfather couldn't leave home."

(TO BE CONTINUED.)

Marriage No Light Ceremony in China

Getting married is complicated business in China. Anna Louise Strong, writing in Harper's Magazine, gives the following description of Chinese wedding customs as related to her by a Chinese student:

"If a marriage is honorable in China, the parents of the groom will pay the money needed. They will send notes from the groom's father: 'On such a date my son will marry the daughter of Mr. So-and-So. Your presence is requested at the feast.' But it is worth much to him, for at the wedding, all honor is shown to this old man, who will now be a grandfather, since his son has taken a wife.

"But if the marriage be without parents' consent, then the young folks cannot be at home on their wedding day. A proper, honorable marriage—it really cannot be done without the parents; otherwise, all is disorder. There are only two other ways for young folks. One is to wait and beseech the parents. Even if they do not like the girl, still they love their son, and if they see him always unhappy, refusing to take any other woman or to give them grandsons, in the end they will often give way."

Daddy on Fire

Little Mildred ran into the house the other day and screamed: "Oh, mother, I just saw daddy on fire!"

"On fire!" the startled mother cried, and Mildred vigorously nodded her head.

After a maternal cross-examination it turned out that Mildred had passed the barber shop and saw a barber applying matches to her father's hair. She had run all the way home to tell mother and save daddy's life.

When father came home a few minutes later he was surprised at the affectionate greeting of his little daughter, who was delighted to see that he had escaped from the fire fiend alive. —Philadelphia Record.

At the Enemy's Mercy

There are now more than six hundred thousand known species of insects trying to drive the human race off the earth and more are being found each year. — Woman's Home Companion.

Cannon Made of Wood Used in West Indies

Any one familiar with the construction of modern weapons of warfare and the high explosives used in them would naturally suppose a cannon made of wood would be of little or no value as a weapon. But wooden cannon have been used with considerable success in revolutionary movements in Cuba, Haiti and the Dominican republic.

The wood used in the construction of these crude weapons was a very tough variety, having a twisted grain that curled about the log in such a way that to split the timber with ordinary means was almost impossible. The best trees were selected, and a piece of the log 5 or 6 feet in length and about 1 foot in diameter was cut. After the bark had been removed and the log made perfectly round, it was swung up on a crude truss and a hole was burned into it from one end. The log was wound with strips of rawhide. When the cannon was covered with the strips of hide, another layer was wound on and this was continued until the weapon had increased several inches in diameter.

After the log was covered and the bore was finished, the weapon was treated to a hot draft, which tended to contract the hide binding.

Canaries Popular

Americans buy approximately 1,000,000 canary birds a year.

Silver Guitar

A guitar made of German silver is said to possess great volume, which makes it suitable for orchestral use, while retaining the sweet tone produced by the wooden guitar. One great advantage of the silver instrument is that it does not warp.

Ancient Inn

What is believed to be the oldest inn in the United States is the Elm Tree inn at Farmington, Conn., which dates from 1670.

Remarkable Growth

An amazing plant that grows several feet in a few weeks has been discovered in the mountains of Tibet. It is a yellow sorrel, growing only at high altitudes around 15,000 feet, and a patch of the flowers can be seen a mile away, like candle flames, against the dark moors. The sorrel is buried under the snow until June, when it suddenly pushes its way through and reaches a height of eight feet in a few weeks.

True American Spirit

The phrase, "Don't give up the ship!" is attributed to James Lawrence, American naval officer, who commanded the Chesapeake, an American ship, in the encounter with the British ship, Shannon. Lawrence was wounded early in the encounter in the leg, but retained his post on the deck. He was mortally wounded a second time, and while being carried below, noticing that the crew was hesitant, cried, "Boys, don't surrender the vessel!"

Wealth From Waste

Aluminum, so popular for the manufacture of pots and kettles, may be superseded or find a close rival in a new metal called beryllium. Extracted from ores previously dumped away as waste, beryllium promises special value in making kitchen utensils, frames for airships and pistons for motor cars.

It is about a third lighter than aluminum yet much harder, with four times its elasticity. It resists salt water, which corrodes aluminum, and seems unaffected by liquids and fumes. Its light gray color takes on a polish like that of fine steel.

Punctuation

Time values for punctuation are given in the method of pointing known as rhetorical punctuation. Here the comma is said to indicate a pause long enough to count one, a semi-colon two, a colon three and a period four. Since readers would vary in rapidity of reading and counting punctuation according to grammatical circumstance is usually followed.

House Made Famous

The location of the house in which Jefferson wrote the Declaration of Indepence was on the south side of Market street, Philadelphia, between Seventh and Eighth streets. The house is no longer standing, but the desk upon which he wrote has been preserved and is the property of the federal government.

Places for Noses

The grindstone is no place for a man to keep his nose, but it is better there than in other folks' affairs.

Two Sorts of Work

Scientists say that four hours' hard mental work is as physically exhausting as eight hours' manual work.

Here and there a "hallelujah" in a people's letter column brightens up the "howlelujahs."

While you look at what is given, look also at the giver.—Seneca.

Change Wrought by Loom

With the introduction of the machine loom at the end of the Nineteenth century, all woven materials fell in price until even velvet was presently in reach of the working class. Before that time, a weaver worked 15 hours to make a yard of velvet, today he can weave 132 yards before night, and the material that was once reserved for the royal houses of Italy is cut this fall into many thousand chic little frocks to sell all over the land.

Men and Music

Dr. Thomas Arnold of Rugby was entirely lacking in musical taste. Speaking of this defect, he says: "I can no more remedy it than I could make my mind mathematical, or than some men could enter into the deep delight with which I look at a wood anemone or wood-sorrel."

Dean Hook used to maintain that Handel's "Messiah" had turned more sinners to righteousness than had all the sermons that were ever preached. —Exchange.

Intelligence

Intelligence is an inherited characteristic which grows year by year in childhood, and is fully developed about sixteen or seventeen, after which you may cultivate the mind through study and experience; but not by the measure of a brain cell can you increase your "intelligence." Many grown-ups, and some of them successful as the world counts success, if tested scientifically, would find that their "intelligence" was no more than that of their schoolboy son of twelve.—Glasgow Herald

Damascus Is Oldest

The oldest city in the world still in existence is Damascus. It is probable that there are ruins of other cities antedating Damascus. Excavations in Central America indicate that some of the oldest cities in the world may originally have stood in these countries. This has not yet been definitely established.

Shakespeare's "Borrowing"

The famous biographies by Plutarch (46-120 A. D.) were of undoubted service to Shakespeare in writing historical plays, "Julius Cæsar," "Anthony and Cleopatra," "Coriolanus" and others. Plutarch spent most of his life writing his "Lives" of Greek and Roman celebrities.

Aerial Teas for London

A leading London aviation service has just started the idea of aerial tea parties, and will hold the events every Friday afternoon throughout the summer. In a 21-seater plane the passengers will be able to view the city while sipping their oolong.

All-Day Rainbow

A rainbow sometimes may be seen all day long in a cloudless sky in Siberia. It is said to be due to reflection of the sun on fine particles of snow in the air.

Axiomatic

The margin of safety grows less as the margin of profit grows more.—Buffalo News.

Marriage Record?

Mr. and Mrs. Robert H. Morse, who came from Colombia to San Francisco for their honeymoon, asserted that they hold the marriage record of the world by being married four times in two hours. They were married at Barranquilla, Colombia. Under the laws of the country the ceremony was first performed by an American minister, then at a civil service, and after that by the American consul and the British consul.

Animal or What?

Julia had been invited to accompany her grandparents to the zoo. When preparing for the trip Junior, Julia's younger brother, asked where his sister was going. His mother told him that Julia's grandmother and grandfather were going to take her to the zoo. Junior asked his mother whether that was not the place where they kept animals. Being assured that it was, he said: "Why are they taking her there? Is she going to turn into an animal or what?"

Hysteria Hits Dogs

Hysteria, or what is known as "fright disease" in some southern states of this country, has attacked valuable racing greyhounds of England. On one day four were ill at the Burnley track, and three at Salford. According to Maj. F. Hopkins, official veterinary surgeon to the Greyhound Racing association, the complaint is new to England, and is believed to have been imported from the United States. It comes to a dog without warning, and the animal goes off "into the blue," cries wildly and becomes uncontrollable.

Manner of Doing It

Whatever we are, high or lowly, learned or unlearned, married or single, in a full house or dwelling in quietness, we have our daily round of work, our duties of affection, obedience, love, mercy, industry, and the like; and that which makes one man differ from another is not so much what things he does, as his manner of doing them.—Cardinal Manning.

Recovering

"Oh I'm coming along, thank ye," cheerily piped old man Totterly, who was ill. "I'm getting weller all the time. I can quarrel with my son-in-law a little, and hope to hold him level after a while. Yes, siree! I'll be strong enough to play checkers by and by."—Philadelphia Record.

Holds Its Age Well

Scientists at the University of California, after geologic survey of Colorado, Utah and Arizona, claim the world is 75,000,000 years old.

Outs and Ins

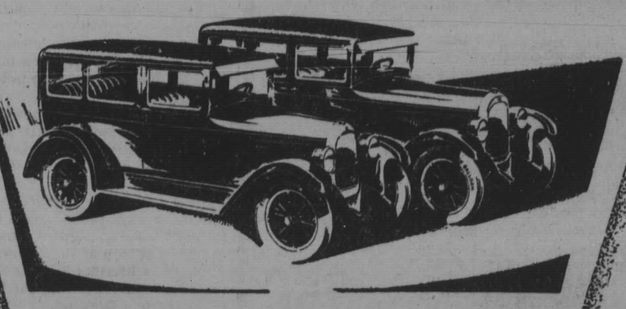
There's this difference: An outlaw frankly robs you of money; an in-law promises to pay it back.—Santa Barbara Daily News.

In fighting insomnia, deliberately stay awake all of one night. That makes insomnia sick.

Suspicion is a heavy armor, and with its own weight impedes more than protects.—Byron.

LOWEST PRICED SEDANS on the market

2,000,000 WILLYS-OVERLAND CARS AND GOING STRONG!



with quality, beauty and style dominating

In definite dollar-for-dollar value there are no 4-door enclosed cars on the market comparable to the Whippet Four and Whippet Six Sedans.

The perfected Whippet Four offers such desirable features as full force-feed lubrication, silent timing chain, extra leg room and powerful 4-wheel brakes. The new Whippet Six, in addition to these, provides a 7-bearing crankshaft, Invar-strut pistons and many other advantages.

Such notable values as these Sedans are possible only because of the skill and experience gained in the production of more than 2,000,000 motor cars.

WHIPPET FOUR SEDAN $610

WHIPPET SIX SEDAN $770 WORLD'S LOWEST PRICED SIX

FOURS Whippet SIXES

Four-cylinder Touring $455; Roadster (2-pass.) $485; Roadster (with rumble seat) $525; Coach $535; Coupe $535; Cabriolet Coupe (with collapsible top) $595. FIREMEN WIN SERIES WITH CEMENT TEAM

The Redwood City firemen were victors in a three-game series with the baseball team of the Pacific Portland Cement Co. Wednesday evening when they won their second game by a score of 8 to 5. In the first game of the series, the firemen were also victorious with a score of 4 to 3. The cement team won the second game with a score of 4 to 2.

The box score was as follows:

Firemen	R	H	E
Winters, 3rd	1	1	0
Russell, ss	2	0	1
Allain, cf	2	2	1
Fleishmann, c	0	1	0
Holmquist, 2nd	0	0	0
Beegle, 1st	1	0	1
Prusch, p	1	1	0
Fitzgerald, lf	1	1	0
Piecq, rf	0	0	0
Herder, sug.	0	0	0
	8	6	3

Cementers	R	H	E
Hewitson, cf	0	2	0
Stephens, lf	0	2	0
Haruff, 3rd	0	0	1
Reposa, 2nd	0	1	0
Farming, ss	2	2	0
Nelson, rf	1	2	0
Keatley, p	0	1	0
Bearing, c	1	2	1
Shields, 1st	1	1	3
	5	12	5

The next game of the firemen will be played on the Sequoia diamond Sunday morning when they will cross bats with a team from Woodside.

While hiking in the foothills west of this city last Sunday afternoon Claude Fox encountered the largest rattlesnake killed in this vicinty for some years. The reptile measured three feet, eight inches and was seven inches in circumference at the tickest part of the body. The rattlers seem to be more numerous than in former years, especially where there exists a rocky formation or in the bottom of dry creeks, so it would be wise to keep your eyes open and watch your step when strolling in such localities.

MRS. E. NOBS PASSES AWAY

Early Wednesday morning at the home of her daughter, Mrs. Otis M. Carrington, Mrs. Elsie Nobs passed away after an illness of many months. She was the widow of Frederick Nobs and since the death of the latter last March had been making her home with her daughter. The family formerly resided on Avondale avenue.

In addition to her daughter, Mrs Carrington, three other children survive. They are Miss Hatty Nobs of Orange, Miss Sophie Nobs of this city and Fred W. Nobs of Grass Valley. Mrs. Nobs was a native of Switzerland, but had spent the greater part of her life in California. She had lived in Redwood City for about 45 years. Mrs. Nobs was one of the most active members of the Congregational church of this city for many years. She was a woman devoted to her family and to her friends of whom she had a large circle.

Funeral services have been arranged for this morning from the James Crowe undertaking parlors. The service will be conducted by Rev. C. H. Stevens of Palo Alto, formerly pastor of the Congregational church of this city. Interment will be in Alta Mesa cemetery.

Mr. and Mrs. Robert Place of this city are receiving the congratulations of their friends upon the birth last week of a baby daughter. This is the second child in the family. Both are girls.

Deputy County Engineer and Mrs. R. A. Klassan and daughter, Virginia, returned Wednesday from a vacation spent with relatives in Los Angeles.

Delegates to the state convention of the American Legion elected from the local post are Dr. R. C. Frazer, post commander, Dr. J. N. Blood and James Davis. Alternates are Emmet Donnelly, James Hearne and Eric Thompson. The convention will be held at Stockton on August 13, 14 and 15th.

Miss Frances E. Weber of St. Vicent's hospital, Los Angeles is spending her vacation with her parents, Mr. and Mrs. Louis Weber of San Mateo Park.

Mr. and Mrs. Wilbur Doxsee and family returned this week from a vacation spent at Capitola.

Joseph R. Fitzpatrick is enjoying a vacation of two weeks in Los Angeles. He left on Tuesday.

John Gill, superintendent of schools of the Redwood City district, returned Sunday from a trip of the northwest and as far as Vancouver, B. C.

Mr. and Mrs. Carl Muller have returned from a ten-day trip through the northern part of the state and Oregon. They went north by motor as far as Portland and returned by boat.

Miss Alberta Choate entertained a number of her friends at a bridge part at her home on Wilson street Tuesday evening. Those present were Mesdames Adelena Jamison, Fred Taylor, Mr. and Mrs. J. Radcliff of Los Angeles, Misses Ethel Headley, Ruth Whitehead, Lydia Locker and Miss Woodstock of San Jose. High scores at bridge were made by Miss Headley and Miss Locker.

Arthur Provost of [illegible] was able to return home from the Stanford hospital, San Francisco, where he was for several days as result of injury to one of his eyes while at his trade as a [illegible]

A baby girl was born at the Redwood City hospital to Mrs. Robert O'Connell. The father is manager of the electric store on Main [illegible]
